

track, Democrats, so we can go in their districts, if they do not vote for it, and threaten their elections."

This is not the spirit in which we should work. We should be working in a bipartisan manner to tell Americans that, yes, trade is good. Trade brings about jobs.

At the same time, we will not abdicate our responsibilities for ensuring that trade does not negatively impact on our environment; that safety rules are not eliminated or violated, as we travel from one country to the next, moving from surrounding countries and bringing large trucks into our boundaries; that we require safety standards; and yes, that we ensure that jobs are not lost, and that there are good and positive working conditions.

Mr. Speaker, I would simply say, we can work on trade issues. We can create jobs. We can help business. We can help small businesses. But this House must do it together.

We must ensure that Americans realize that trade is about jobs and the environment and working together.

COMMENDING THE HOUSE FOR OUTSTANDING WORK ON SAVING SOCIAL SECURITY AND IMPROVING THE LIVES AND HEALTH OF SENIOR CITIZENS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. FOX) is recognized for 5 minutes.

Mr. FOX of Pennsylvania. Mr. Speaker, I rise to address the House this evening to commend the House for its outstanding work. I appreciate the time to address the House, because I think it is very important. With the passage today of the Save Social Security Act, it is one more way to make sure that our senior citizens are protected. This new legislation will make sure that with any budget surplus, and with the \$1.4 trillion, the first money from that surplus will go to the social security trust fund for our senior citizens.

Mr. Speaker, with senior citizens living longer we want to make sure they live better. We wanted to make sure we strengthen the social security system. We also at the same time want to look to improving health care for our seniors and others. That is why the House is to be congratulated for leading the way here in Congress and in Washington on FDA reform, to make sure we speed up the approval of lifesaving drugs and medical devices.

That legislation, while we are waiting for a cure or vaccine for many illnesses, will help us be able to make sure that we are helping with clinical trials and with third-party review, and be able to make sure that we help our citizens live longer and better.

I am interested in also pointing out that here in Congress and the House we have worked to double the NIH funding, the National Institutes of Health. That is very important when it comes

to increasing the research monies that are allocated for breast cancer research, uterine cancer, ovarian cancer, prostate cancer. It is coming at a very important time.

Tomorrow, Mr. Speaker, we are having the first ever march of its kind, a march to fight against cancer, to find a cure in our lifetime for all the cancers. This is an important march where very important health care providers, health care practitioners, researchers, and entertainers will be here on the Washington Mall, together with elected officials, to make sure we stand arm in arm to make sure the kind of dollars, resources, and emphasis is placed on cures for cancer.

That dovetails with legislation that I have introduced, Mr. Speaker, to protect our senior citizens, the Senior Citizen Bill of Rights. In that legislation we are going to roll back the 1993 tax on Social Security. We are going to keep social security off-budget, so it is not used for other purposes, but used for seniors and their security.

It will also address the notch baby problem, those babies born between 1917 and 1926 who are in their golden years and should be able to have the full benefits that other Social Security recipients have. Our notch baby provision will be addressed in that legislation.

We also, in the Senior Citizen Bill of Rights, increase the penalties for those who would commit fraud against senior citizens, such as telemarketing fraud and others who would prey upon our senior citizens and take away their life savings.

Also our legislation calls for elimination of the inheritance taxes. Many people have a family business, a family farm, and they take the money and have to give it to Uncle Sam, instead of making sure the next generation of the family can enjoy the fruits of labor that many of our families and friends have built up over a lifetime.

Finally, we have patient protection. We have legislation this House has adopted to make sure, Mr. Speaker, that doctors have the final say in making sure our patients get the medical advice they need, get the referrals to specialists they need, get the admissions to hospitals that they need, and as well, have the right to appeal a wrongful denial of health care on behalf of their patients and our constituents.

I think we have done a great deal to move forward in health care as far as senior citizens, on their rights, on their security, and making sure, above all, that Social Security and Medicare are protected and saved and strengthened.

The final item which I think we will embark on is the fact that we make sure with Medicare we have those new prevention programs on an annual basis, the mammograms that are annual, we have the pap smears, we also have the colorectal cancer screening, the diabetes screening, and osteoporosis.

Those kinds of prevention programs we fought for are making a difference, and the fact that those who would now defraud Medicare are eligible for jail terms and loss of rights to be a provider are strengthening Medicare the way citizens want.

We need to move forward, together with much other legislation, but we certainly have to take this time to look at what we have done for our seniors, and to make sure we redouble our efforts to do even more.

CONFERENCE REPORT ON H.R. 4060

Mr. MCDADE submitted the following conference report and statement on the bill (H.R. 4060) making appropriations for energy and water development for the fiscal year ending September 30, 1999, and for other purposes:

CONFERENCE REPORT (H. REPT. 105-749)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4060) "making appropriations for energy and water development for the fiscal year ending September 30, 1999, and for other purposes", having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert:

That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year ending September 30, 1999, for energy and water development, and for other purposes, namely:

TITLE I

DEPARTMENT OF DEFENSE—CIVIL

DEPARTMENT OF THE ARMY

CORPS OF ENGINEERS—CIVIL

The following appropriations shall be expended under the direction of the Secretary of the Army and the supervision of the Chief of Engineers for authorized civil functions of the Department of the Army pertaining to rivers and harbors, flood control, beach erosion, and related purposes.

GENERAL INVESTIGATIONS

For expenses necessary for the collection and study of basic information pertaining to river and harbor, flood control, shore protection, and related projects, restudy of authorized projects, miscellaneous investigations, and, when authorized by laws, surveys and detailed studies and plans and specifications of projects prior to construction, \$161,747,000, to remain available until expended, of which funds are provided for the following projects in the amounts specified:

Delaware Bay Coastline, Delaware and New Jersey, \$419,000;

Tampa Harbor, Alafia Channel, Florida, \$200,000;

Barnegat Inlet to Little Egg Harbor Inlet, New Jersey, \$322,000;

Brigantine Inlet to Great Egg Harbor Inlet, New Jersey, \$113,000;

Great Egg Harbor Inlet to Townsend's Inlet, New Jersey, \$200,000;

Lower Cape May Meadows—Cape May Point, New Jersey, \$100,000;

Manasquan Inlet to Barnegat Inlet, New Jersey, \$300,000;

Raritan Bay to Sandy Hook Bay, New Jersey, \$750,000; and

Townsend's Inlet to Cape May Inlet, New Jersey, \$250,000;

Provided, That the Secretary of the Army, acting through the Chief of Engineers, is directed to use \$700,000 of the funds appropriated in Public Law 102-377 for the Red River Waterway, Shreveport, Louisiana, to Daingerfield, Texas, project for the feasibility phase of the Red River Navigation, Southwest Arkansas, study: Provided further, That the Secretary of the Army is directed to use \$500,000 of the funds appropriated herein to implement section 211(f)(7) of Public Law 104-303 (110 Stat. 3684) and to reimburse the non-Federal sponsor a portion of the Federal share of project costs for the Hunting Bayou element of the project for flood control, Buffalo Bayou and tributaries, Texas: Provided further, That the Secretary of the Army is directed to use \$300,000 of the funds appropriated herein to implement section 211(f)(8) of Public Law 104-303 (110 Stat. 3684) and to reimburse the non-Federal sponsor a portion of the Federal share of project costs for the project for flood control, White Oak Bayou watershed, Texas.

CONSTRUCTION, GENERAL

For the prosecution of river and harbor, flood control, shore protection, and related projects authorized by laws; and detailed studies, and plans and specifications, of projects (including those for development with participation or under consideration for participation by States, local governments, or private groups) authorized or made eligible for selection by law (but such studies shall not constitute a commitment of the Government to construction), \$1,429,885,000, to remain available until expended, of which such sums as are necessary for the Federal share of construction costs for facilities under the Dredged Material Disposal Facilities program shall be derived from the Harbor Maintenance Trust Fund, as authorized by Public Law 104-303; and of which such sums as are necessary pursuant to Public Law 99-662 shall be derived from the Inland Waterways Trust Fund, for one-half of the costs of construction and rehabilitation of inland waterways projects, including rehabilitation costs for the Lock and Dam 25, Mississippi River, Illinois and Missouri; Lock and Dam 14, Mississippi River, Iowa; Lock and Dam 24, Part 1, Mississippi River, Illinois and Missouri; and Lock and Dam 3, Mississippi River, Minnesota, projects, and of which funds are provided for the following projects in the amounts specified:

Norco Bluffs, California, \$4,400,000;
Panama City Beaches, Florida, \$6,000,000;
Tybee Island, Georgia, \$1,200,000;
Indiana Shoreline Erosion, Indiana, \$700,000;
Indianapolis Central Waterfront, Indiana, \$4,000,000;

Ohio River Flood Protection, Indiana, \$750,000;

Harlan/Clover Fork, Williamsburg, Pike County, Middlesboro, Martin County, and Town of Martin, elements of the Levisa and Tug Forks of the Big Sandy River and Upper Cumberland River project in Kentucky, \$25,230,000;

Southern and Eastern Kentucky, Kentucky, \$4,000,000;

Lake Pontchartrain and Vicinity (Hurricane Protection), Louisiana, \$16,000,000;

Lake Pontchartrain (Jefferson Parish) Stormwater Discharge, Louisiana, \$4,500,000;

Southeast Louisiana, Louisiana, \$75,000,000;

Jackson County, Mississippi, \$6,200,000;

Pascagoula Harbor, Mississippi, \$12,000,000;

Passaic River Streambank Restoration, New Jersey, \$3,000,000;

Lackawanna River, Olyphant, Pennsylvania, \$6,800,000;

Lackawanna River, Scranton, Pennsylvania, \$40,551,000;

South Central Pennsylvania Environment Improvement Program, \$39,000,000, of which \$13,000,000 shall be available only for water-related environmental infrastructure and resource

protection and development projects in Lackawanna, Lycoming, Susquehanna, Wyoming, Pike, and Monroe counties in Pennsylvania in accordance with the purposes of subsection (a) and requirements of subsections (b) through (e) of section 313 of the Water Resources Development Act of 1992, as amended:

Wallisville Lake, Texas, \$5,500,000;
Virginia Beach, Virginia (Hurricane Protection), \$18,000,000;

Upper Mingo County (including Mingo County Tributaries), Lower Mingo County (Kermit), Wayne County, Hatfield Bottom, and McDowell County, elements of the Levisa and Tug Forks of the Big Sandy River and Upper Cumberland River project in West Virginia, \$11,350,000; and

West Virginia and Pennsylvania Flood Control, West Virginia and Pennsylvania, \$750,000;

Provided, That the Secretary of the Army is directed to incorporate the economic analyses for the Green Ridge and Plot sections of the Lackawanna River, Scranton, Pennsylvania, project with the economic analysis for the Albright Street section of the project, and to cost-share and implement these combined sections as a single project with no separable elements, except that each section may be undertaken individually when the non-Federal sponsor provides the applicable local cooperation requirements:

Provided further, That any funds heretofore appropriated and made available in Public Law 103-126 for projects associated with the restoration of the Lackawanna River Basin Greenway Corridor, Pennsylvania, may be utilized by the Secretary of the Army in carrying out other projects and activities on the Lackawanna River in Pennsylvania: Provided further, That the Secretary of the Army is directed to use \$4,500,000 of the funds appropriated herein to implement section 211(f)(6) of Public Law 104-303 (110 Stat. 3683) and to reimburse the non-Federal sponsor a portion of the Federal share of project construction costs for the flood control components comprising the Brays Bayou element of the project for flood control, Buffalo Bayou and tributaries, Texas: Provided further, That the navigation project for Cook Inlet Navigation, Alaska, authorized by Section 101(b)(2) of Public Law 104-303 is modified to authorize the Secretary of the Army, acting through the Chief of Engineers, to construct the project at a total cost of \$12,600,000 with an estimated first Federal cost of \$9,450,000 and an estimated first non-Federal cost of \$3,150,000: Provided further, That the flood control project for West Sacramento, California, authorized by Section 101(4) of Public Law 102-580 is modified to authorize the Secretary of the Army, acting through the Chief of Engineers, to construct the project at a total cost of \$32,900,000 with an estimated first Federal cost of \$24,700,000 and an estimated first non-Federal cost of \$8,200,000: Provided further, That the flood control project for Sacramento River, Glenn-Colusa Irrigation District, California, authorized by Section 2 of the Act entitled "An Act to provide for the control of floods of the Mississippi River and the Sacramento River, and for other purposes", approved March 1, 1917 (39 Stat. 949), is modified to authorize the Secretary of the Army, acting through the Chief of Engineers, to construct the project at a total cost of \$20,700,000 with an estimated first Federal cost of \$15,570,000 and an estimated first non-Federal cost of \$5,130,000: Provided further, That the Secretary of the Army, acting through the Chief of Engineers, is directed to use \$4,000,000 provided herein to construct bluff stabilization measures at authorized locations for Natchez Bluff, Mississippi, at a total estimated cost of \$26,065,000 with an estimated first Federal cost of \$19,549,000 and an estimated first non-Federal cost of \$6,516,000 and to award continuing contracts, which are not to be considered fully funded: Provided further, That the Secretary of the Army, acting through the Chief of Engineers, may use up to \$5,000,000 of the funding appropriated herein for construction of an emergency outlet from Devils Lake,

North Dakota, to the Sheyenne River, except that funds shall not become available unless the Secretary of the Army determines that an emergency (as defined in section 102 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122)) exists with respect to the emergency need for the outlet and reports to Congress that the construction is technically sound, economically justified, and environmentally acceptable and in compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.): Provided further, That the economic justification for the emergency outlet shall be prepared in accordance with the principles and guidelines for economic evaluation as required by regulations and procedures of the Army Corps of Engineers for all flood control projects, and that the economic justification be fully described, including the analysis of the benefits and costs, in the project plan documents: Provided further, That the plans for the emergency outlet shall be reviewed and, to be effective, shall contain assurances provided by the Secretary of State, after consultation with the International Joint Commission, that the project will not violate the requirements or intent of the Treaty Between the United States and Great Britain Relating to Boundary Waters Between the United States and Canada, signed at Washington January 11, 1909 (36 Stat. 2448; TS 548) (commonly known as the "Boundary Waters Treaty of 1909"): Provided further, That the Secretary of the Army shall submit the final plans and other documents for the emergency outlet to Congress: Provided further, That no funds made available under this Act or any other Act for any fiscal year may be used by the Secretary of the Army to carry out the portion of the feasibility study of the Devils Lake Basin, North Dakota, authorized under the Energy and Water Development Appropriations Act, 1993 (Public Law 102-377), that addresses the needs of the area for stabilized lake levels through inlet controls, or to otherwise study any facility or carry out any activity that would permit the transfer of water from the Missouri River Basin into Devils Lake: Provided further, That, the Secretary of the Army, acting through the Chief of Engineers, is directed to transfer remaining General Investigations funds previously appropriated for the Juniata River, Pennsylvania, study and Mussels Dam, Pennsylvania, project to Construction, General for use in equal amounts at Broad Top/Coaldale, Bedford County, Pennsylvania, and Mont Alto Borough, Franklin County, Pennsylvania, which are part of the South Central Pennsylvania Environment Improvement Program.

FLOOD CONTROL, MISSISSIPPI RIVER AND TRIBUTARIES, ARKANSAS, ILLINOIS, KENTUCKY, LOUISIANA, MISSISSIPPI, MISSOURI, AND TENNESSEE

For expenses necessary for prosecuting work of flood control, and rescue work, repair, restoration, or maintenance of flood control projects threatened or destroyed by flood, as authorized by law (33 U.S.C. 702a, 702g-1), \$321,149,000, to remain available until expended.

OPERATION AND MAINTENANCE, GENERAL

For expenses necessary for the preservation, operation, maintenance, and care of existing river and harbor, flood control, and related works, including such sums as may be necessary for the maintenance of harbor channels provided by a State, municipality or other public agency, outside of harbor lines, and serving essential needs of general commerce and navigation; surveys and charting of northern and northwestern lakes and connecting waters; clearing and straightening channels; and removal of obstructions to navigation, \$1,653,252,000, to remain available until expended, of which such sums as become available from the special account established by the Land and Water Conservation Act of 1965, as amended (16 U.S.C. 460l), may be derived from that account for construction, operation, and maintenance of outdoor recreation facilities,

and of which \$4,200,000 is provided for repair of Chickamauga Lock, Tennessee: Provided, That no funds, whether appropriated, contributed, or otherwise provided, shall be available to the United States Army Corps of Engineers for the purpose of acquiring land in Jasper County, South Carolina, in connection with the Savannah Harbor navigation project: Provided further, That the Secretary of the Army, acting through the Chief of Engineers, is directed to undertake authorized maintenance and repairs on the Allegheny River, Pennsylvania, project, using \$6,000,000 of funds provided under this heading in Public Law 105-62 for extending the navigation channel on the Allegheny River, Pennsylvania, project to provide passenger boat access to the Kittanning, Pennsylvania, Riverfront Park.

REGULATORY PROGRAM

For expenses necessary for administration of laws pertaining to regulation of navigable waters and wetlands, \$106,000,000, to remain available until expended.

FORMERLY UTILIZED SITES REMEDIAL ACTION PROGRAM

(INCLUDING TRANSFER OF FUNDS)

For expenses necessary to clean up contaminated sites throughout the United States where work was performed as part of the Nation's early atomic energy program, \$140,000,000, to remain available until expended: Provided, That the response actions by the U.S. Army Corps of Engineers under this program shall consist of the following functions and activities to be performed at eligible sites where remediation has not been completed: sampling and assessment of contaminated areas, characterization of site conditions, determination of the nature and extent of contamination, selection of the necessary and appropriate response actions as the lead Federal agency, preparation of designation reports, cleanup and closeout of sites, and any other functions determined by the Chief of Engineers as necessary for remediation: Provided further, That response actions by the U.S. Army Corps of Engineers under this program shall be subject to the administrative, procedural, and regulatory provisions of the Comprehensive Environmental Response, Compensation and Liability Act, 42 U.S.C. 9601 et seq., and the National Oil and Hazardous Substances Pollution Contingency Plan, 40 C.F.R., Chapter 1, Part 300: Provided further, That, except as stated herein, these provisions do not alter, curtail or limit the authorities, functions or responsibilities of other agencies under the Atomic Energy Act, 42 U.S.C. 2011 et seq.: Provided further, That any sums recovered under CERCLA for response actions, or recovered from a contractor, insurer, surety, or other person to reimburse the U.S. Army Corps of Engineers for any expenditures for response actions, shall be credited to the account used to fund response actions on eligible sites, and will be available for response action costs for any eligible site: Provided further, That the Secretary of Energy may exercise the authority of 42 U.S.C. 2208 to make payments in lieu of taxes for Federally-owned property where Formerly Utilized Sites Remedial Action Program activities are conducted, regardless of which Federal agency has acquired the property and notwithstanding references to "the activities of the Commission" in 42 U.S.C. 2208: Provided further, That the unexpended balances of prior appropriations provided for these activities in this Act or any previous Energy and Water Development Appropriations Act may be transferred to and merged with this appropriation account, and thereafter, may be accounted for as one fund for the same time period as originally enacted.

GENERAL EXPENSES

For expenses necessary for general administration and related functions in the Office of the Chief of Engineers and offices of the Division Engineers; activities of the Coastal Engi-

neering Research Board, the Humphreys Engineer Center Support Activity, the Water Resources Support Center, and headquarters support functions at the USACE Finance Center; \$148,000,000, to remain available until expended: Provided, That no part of any other appropriation provided in title I of this Act shall be available to fund the activities of the Office of the Chief of Engineers or the executive direction and management activities of the division offices.

REVOLVING FUND

Using amounts available in the Revolving Fund, the Secretary of the Army is authorized to renovate office space in the General Accounting Office headquarters building in Washington, DC, for use by the Corps and GAO. The Secretary is authorized to enter into a lease with GAO to occupy such renovated space as appropriate, for the Corps' headquarters. The Secretary shall ensure that the Revolving Fund is appropriately reimbursed from appropriations of the Corps' benefitting programs by collection each year of amounts sufficient to repay the capitalized cost of such renovation and through rent reductions or rebates from GAO.

ADMINISTRATIVE PROVISION

Appropriations in this title shall be available for official reception and representation expenses (not to exceed \$5,000); and during the current fiscal year the Revolving Fund, Corps of Engineers, shall be available for purchase (not to exceed 100 for replacement only) and hire of passenger motor vehicles.

GENERAL PROVISIONS

CORPS OF ENGINEERS—CIVIL

SEC. 101. Notwithstanding any other provisions of law, no fully allocated funding policy shall be applied to projects for which funds are identified in the Committee reports accompanying this Act under the Construction, General; Operation and Maintenance, General; and Flood Control, Mississippi River and Tributaries, appropriation accounts: Provided, That the Secretary of the Army, acting through the Chief of Engineers, is directed to undertake these projects using continuing contracts, as authorized in section 10 of the Rivers and Harbors Act of September 22, 1922 (33 U.S.C. 621).

SEC. 102. None of the funds made available in this Act may be used to revise the Missouri River Master Water Control Manual when it is made known to the Federal entity or official to which the funds are made available that such revision provides for an increase in the springtime water release program during the spring heavy rainfall and snow melt period in States that have rivers draining into the Missouri River below the Gavins Point Dam.

TITLE II

DEPARTMENT OF THE INTERIOR

CENTRAL UTAH PROJECT

CENTRAL UTAH PROJECT COMPLETION ACCOUNT

For carrying out activities authorized by the Central Utah Project Completion Act, and for activities related to the Uintah and Upalco Units authorized by 43 U.S.C. 620, \$41,217,000, to remain available until expended, of which \$15,476,000 shall be deposited into the Utah Reclamation Mitigation and Conservation Account: Provided, That of the amounts deposited into that account, \$5,000,000 shall be considered the Federal contribution authorized by paragraph 402(b)(2) of the Central Utah Project Completion Act and \$10,476,000 shall be available to the Utah Reclamation Mitigation and Conservation Commission to carry out activities authorized under that Act.

In addition, for necessary expenses incurred in carrying out related responsibilities of the Secretary of the Interior, \$1,283,000, to remain available until expended.

BUREAU OF RECLAMATION

For carrying out the functions of the Bureau of Reclamation as provided in the Federal rec-

lamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto) and other Acts applicable to that Bureau as follows:

WATER AND RELATED RESOURCES

(INCLUDING TRANSFER OF FUNDS)

For management, development, and restoration of water and related natural resources and for related activities, including the operation, maintenance and rehabilitation of reclamation and other facilities, participation in fulfilling related Federal responsibilities to Native Americans, and related grants to, and cooperative and other agreements with, State and local governments, Indian Tribes, and others, \$642,845,000, to remain available until expended, of which \$2,800,000 shall be for construction of the Tooele Wastewater Treatment and Reuse, Utah, project, and of which \$1,873,000 shall be available for transfer to the Upper Colorado River Basin Fund and \$45,990,000 shall be available for transfer to the Lower Colorado River Basin Development Fund, and of which such amounts as may be necessary may be advanced to the Colorado River Dam Fund: Provided, That such transfers may be increased or decreased within the overall appropriation under this heading: Provided further, That of the total appropriated, the amount for program activities that can be financed by the Reclamation Fund or the Bureau of Reclamation special fee account established by 16 U.S.C. 4601-6a(i) shall be derived from that Fund or account: Provided further, That funds contributed under 43 U.S.C. 395 are available until expended for the purposes for which contributed: Provided further, That funds advanced under 43 U.S.C. 397a shall be credited to this account and are available until expended for the same purposes as the sums appropriated under this heading: Provided further, That of the total appropriated, \$25,800,000 shall be derived by transfer of unexpended balances from the Bureau of Reclamation Working Capital Fund: Provided further, That funds available for expenditure for the Departmental Irrigation Drainage Program may be expended by the Bureau of Reclamation for site remediation on a non-reimbursable basis: Provided further, That the amount authorized for Indian municipal, rural, and industrial water features by section 10 of Public Law 89-108, as amended by section 8 of Public Law 99-294 and section 1701(b) of Public Law 102-575, is increased by \$2,000,000 (October 1997 prices): Provided further, That the Secretary of the Interior is directed to use not to exceed \$3,600,000 of funds appropriated herein as the Bureau of Reclamation share for completion of the McCall Area Wastewater Reclamation and Reuse, Idaho, project authorized in Public Law 105-62 and described in PN-FONSI-96-05.

BUREAU OF RECLAMATION LOAN PROGRAM

ACCOUNT

For the cost of direct loans and/or grants, \$7,996,000, to remain available until expended, as authorized by the Small Reclamation Projects Act of August 6, 1956, as amended (43 U.S.C. 422a-422j): Provided, That such costs, including the cost of modifying such loans, shall be as defined in section 502 of the Congressional Budget Act of 1974, as amended: Provided further, That these funds are available to subsidize gross obligations for the principal amount of direct loans not to exceed \$38,000,000.

In addition, for administrative expenses necessary to carry out the program for direct loans and/or grants, \$425,000, to remain available until expended: Provided, That of the total sums appropriated, the amount of program activities that can be financed by the Reclamation Fund shall be derived from that Fund.

CENTRAL VALLEY PROJECT RESTORATION FUND

For carrying out the programs, projects, plans, and habitat restoration, improvement, and acquisition provisions of the Central Valley Project Improvement Act, \$33,130,000, to be derived from such sums as may be collected in the

Central Valley Project Restoration Fund pursuant to sections 3407(d), 3404(c)(3), 3405(f), and 3406(c)(1) of Public Law 102-575, to remain available until expended: Provided, That the Bureau of Reclamation is directed to assess and collect the full amount of the additional mitigation and restoration payments authorized by section 3407(d) of Public Law 102-575.

**CALIFORNIA BAY-DELTA ECOSYSTEM RESTORATION
(INCLUDING TRANSFER OF FUNDS)**

For necessary expenses of the Department of the Interior and other participating Federal agencies in carrying out the California Bay-Delta Environmental Enhancement and Water Security Act, consistent with plans to be approved by the Secretary of the Interior, in consultation with such Federal agencies, \$75,000,000, to remain available until expended, of which such amounts as may be necessary to conform with such plans shall be transferred to appropriate accounts of such Federal agencies: Provided, That such funds may be obligated only as non-Federal sources provide their share in accordance with the cost-sharing agreement required under section 102(d) of such Act: Provided further, That such funds may be obligated prior to the completion of a final programmatic environmental impact statement only if: (1) consistent with 40 CFR 1506.1(c); and (2) used for purposes that the Secretary finds are of sufficiently high priority to warrant such an expenditure.

POLICY AND ADMINISTRATION

For necessary expenses of policy, administration, and related functions in the office of the Commissioner, the Denver office, and offices in the five regions of the Bureau of Reclamation, to remain available until expended, \$47,000,000, to be derived from the Reclamation Fund and be nonreimbursable as provided in 43 U.S.C. 377: Provided, That no part of any other appropriation in this Act shall be available for activities or functions budgeted as policy and administration expenses.

ADMINISTRATIVE PROVISION

Appropriations for the Bureau of Reclamation shall be available for purchase of not to exceed six passenger motor vehicles for replacement only.

TITLE III

DEPARTMENT OF ENERGY

ENERGY PROGRAMS

ENERGY SUPPLY

For expenses of the Department of Energy activities including the purchase, construction and acquisition of plant and capital equipment and other expenses necessary for energy supply, and uranium supply and enrichment activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion; and the purchase of not to exceed 22 passenger motor vehicles for replacement only, \$727,091,000, of which not to exceed \$3,000 may be used for official reception and representation expenses for transparency activities.

NON-DEFENSE ENVIRONMENTAL MANAGEMENT

For Department of Energy expenses, including the purchase, construction and acquisition of plant and capital equipment and other expenses necessary for non-defense environmental management activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction or expansion, \$431,200,000, to remain available until expended.

**URANIUM ENRICHMENT DECONTAMINATION AND
DECOMMISSIONING FUND**

For necessary expenses in carrying out uranium enrichment facility decontamination and

decommissioning, remedial actions and other activities of title II of the Atomic Energy Act of 1954 and title X, subtitle A of the Energy Policy Act of 1992, \$220,200,000, to be derived from the Fund, to remain available until expended: Provided, That \$30,000,000 of amounts derived from the Fund for such expenses shall be available in accordance with title X, subtitle A, of the Energy Policy Act of 1992.

SCIENCE

For expenses of the Department of Energy activities including the purchase, construction and acquisition of plant and capital equipment and other expenses necessary for science activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or facility or for plant or facility acquisition, construction, or expansion, and purchase of not to exceed 5 passenger motor vehicles for replacement only, \$2,682,860,000, to remain available until expended: Provided, That \$7,600,000 of the unobligated balances originally available for Superconducting Super Collider termination activities shall be made available for other activities under this heading.

NUCLEAR WASTE DISPOSAL

For nuclear waste disposal activities to carry out the purposes of Public Law 97-425, as amended, including the acquisition of real property or facility construction or expansion, \$169,000,000, to remain available until expended, of which \$165,000,000 is to be derived from the Nuclear Waste Fund; and of which not to exceed \$250,000 may be provided to the Department of Energy to reimburse the State of Nevada solely for expenditures, other than salaries and expenses of State employees, to conduct scientific oversight responsibilities pursuant to the Nuclear Waste Policy Act of 1982, and not to exceed \$5,540,000 may be provided to affected local governments, as defined in Public Law 97-425, to conduct appropriate activities pursuant to the Act: Provided, That the distribution of the funds to the units of local government shall be determined by the Department of Energy: Provided further, That the funds shall be made available to the units of local government by direct payment: Provided further, That within ninety days of the completion of each Federal fiscal year, each local entity shall provide certification to the Department of Energy, that all funds expended from such payments have been expended for activities as defined in Public Law 97-425. Failure to provide such certification shall cause such entity to be prohibited from any further funding provided for similar activities: Provided further, That none of the funds herein appropriated may be: (1) used directly or indirectly to influence legislative action on any matter pending before Congress or a State legislature or for lobbying activity as provided in 18 U.S.C. 1913; (2) used for litigation expenses; or (3) used to support multi-state efforts or other coalition building activities inconsistent with the restrictions contained in this Act.

DEPARTMENTAL ADMINISTRATION

For salaries and expenses of the Department of Energy necessary for departmental administration in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the hire of passenger motor vehicles and official reception and representation expenses (not to exceed \$35,000), \$200,475,000, to remain available until expended, plus such additional amounts as necessary to cover increases in the estimated amount of cost of work for others notwithstanding the provisions of the Anti-Deficiency Act (31 U.S.C. 1511 et seq.): Provided, That such increases in cost of work are offset by revenue increases of the same or greater amount, to remain available until expended: Provided further, That moneys received by the Department for miscellaneous revenues estimated to total \$136,530,000 in fiscal year 1999

may be retained and used for operating expenses within this account, and may remain available until expended, as authorized by section 201 of Public Law 95-238, notwithstanding the provisions of 31 U.S.C. 3302: Provided further, That the sum herein appropriated shall be reduced by the amount of miscellaneous revenues received during fiscal year 1999 so as to result in a final fiscal year 1999 appropriation from the General Fund estimated at not more than \$63,945,000.

OFFICE OF THE INSPECTOR GENERAL

For necessary expenses of the Office of the Inspector General in carrying out the provisions of the Inspector General Act of 1978, as amended, \$29,000,000, to remain available until expended.

ATOMIC ENERGY DEFENSE ACTIVITIES

WEAPONS ACTIVITIES

For Department of Energy expenses, including the purchase, construction and acquisition of plant and capital equipment and other incidental expenses necessary for atomic energy defense weapons activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion; the purchase of not to exceed one fixed wing aircraft; and the purchase of passenger motor vehicles (not to exceed 32 for replacement only, and one bus), \$4,400,000,000, to remain available until expended: Provided, That funding for any ballistic missile defense program undertaken by the Department of Energy for the Department of Defense shall be provided by the Department of Defense according to procedures established for Work for Others by the Department of Energy.

**DEFENSE ENVIRONMENTAL RESTORATION AND
WASTE MANAGEMENT**

For Department of Energy expenses, including the purchase, construction and acquisition of plant and capital equipment and other expenses necessary for atomic energy defense environmental restoration and waste management activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion; and the purchase of passenger motor vehicles (not to exceed 3 new sedans and 6 for replacement only, of which 3 are sedans, 2 are buses, and 1 is an ambulance), \$4,310,227,000, to remain available until expended.

DEFENSE FACILITIES CLOSURE PROJECTS

For expenses of the Department of Energy to accelerate the closure of defense environmental management sites, including the purchase, construction and acquisition of plant and capital equipment and other necessary expenses, \$1,038,240,000, to remain available until expended.

**DEFENSE ENVIRONMENTAL MANAGEMENT
PRIVATIZATION**

For Department of Energy expenses for privatization projects necessary for atomic energy defense environmental management activities authorized by the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), \$228,357,000, to remain available until expended.

OTHER DEFENSE ACTIVITIES

For Department of Energy expenses, including the purchase, construction and acquisition of plant and capital equipment and other expenses necessary for atomic energy defense, other defense activities, in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101, et seq.), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion, \$1,696,676,000, to remain available until expended.

DEFENSE NUCLEAR WASTE DISPOSAL

For nuclear waste disposal activities to carry out the purposes of Public Law 97-425, as amended, including the acquisition of real property or facility construction or expansion, \$189,000,000, to remain available until expended.

POWER MARKETING ADMINISTRATIONS

BONNEVILLE POWER ADMINISTRATION FUND

Expenditures from the Bonneville Power Administration Fund, established pursuant to Public Law 93-454, are approved for official reception and representation expenses in an amount not to exceed \$1,500.

During fiscal year 1999, no new direct loan obligations may be made.

OPERATION AND MAINTENANCE, SOUTHEASTERN POWER ADMINISTRATION

For necessary expenses of operation and maintenance of power transmission facilities and of marketing electric power and energy pursuant to the provisions of section 5 of the Flood Control Act of 1944 (16 U.S.C. 825s), as applied to the southeastern power area, \$7,500,000, to remain available until expended; in addition, notwithstanding 31 U.S.C. 3302, not to exceed \$28,000,000 in reimbursements, of which \$20,000,000 is for transmission wheeling and ancillary services and \$8,000,000 is for power purchases at the Richard B. Russell Project, to remain available until expended.

OPERATION AND MAINTENANCE, SOUTHWESTERN POWER ADMINISTRATION

For necessary expenses of operation and maintenance of power transmission facilities and of marketing electric power and energy, and for construction and acquisition of transmission lines, substations and appurtenant facilities, and for administrative expenses, including official reception and representation expenses in an amount not to exceed \$1,500 in carrying out the provisions of section 5 of the Flood Control Act of 1944 (16 U.S.C. 825s), as applied to the southwestern power area, \$26,000,000, to remain available until expended; in addition, notwithstanding the provisions of 31 U.S.C. 3302, not to exceed \$4,200,000 in reimbursements, to remain available until expended.

CONSTRUCTION, REHABILITATION, OPERATION AND MAINTENANCE, WESTERN AREA POWER ADMINISTRATION

For carrying out the functions authorized by title III, section 302(a)(1)(E) of the Act of August 4, 1977 (42 U.S.C. 7152), and other related activities including conservation and renewable resources programs as authorized, including official reception and representation expenses in an amount not to exceed \$1,500, \$203,000,000, to remain available until expended, of which \$193,787,000 shall be derived from the Department of the Interior Reclamation Fund: Provided, That of the amount herein appropriated, \$5,036,000 is for deposit into the Utah Reclamation Mitigation and Conservation Account pursuant to title IV of the Reclamation Projects Authorization and Adjustment Act of 1992.

FALCON AND AMISTAD OPERATING AND MAINTENANCE FUND

For operation, maintenance, and emergency costs for the hydroelectric facilities at the Falcon and Amistad Dams, \$1,010,000, to remain available until expended, and to be derived from the Falcon and Amistad Operating and Maintenance Fund of the Western Area Power Administration, as provided in section 423 of the Foreign Relations Authorization Act, Fiscal Years 1994 and 1995.

FEDERAL ENERGY REGULATORY COMMISSION SALARIES AND EXPENSES

For necessary expenses of the Federal Energy Regulatory Commission to carry out the provisions of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including services as authorized by 5 U.S.C. 3109, the hire of passenger motor vehicles, and official reception and

representation expenses (not to exceed \$3,000), \$167,500,000, to remain available until expended: Provided, That notwithstanding any other provision of law, not to exceed \$167,500,000 of revenues from fees and annual charges, and other services and collections in fiscal year 1999 shall be retained and used for necessary expenses in this account, and shall remain available until expended: Provided further, That the sum herein appropriated from the General Fund shall be reduced as revenues are received during fiscal year 1999 so as to result in a final fiscal year 1999 appropriation from the General Fund estimated at not more than \$0.

GENERAL PROVISIONS

DEPARTMENT OF ENERGY

SEC. 301. (a) None of the funds appropriated by this Act or any prior appropriations Act may be used to award a management and operating contract unless such contract is awarded using competitive procedures or the Secretary of Energy grants, on a case-by-case basis, a waiver to allow for such a deviation. The Secretary may not delegate the authority to grant such a waiver.

(b) At least 60 days before a contract award, amendment, or modification for which the Secretary intends to grant such a waiver, the Secretary shall submit to the Subcommittees on Energy and Water Development of the Committees on Appropriations of the House of Representatives and the Senate a report notifying the subcommittees of the waiver and setting forth the reasons for the waiver.

SEC. 302. (a) None of the funds appropriated by this Act or any prior appropriations Act may be used to award, amend, or modify a contract in a manner that deviates from the Federal Acquisition Regulation, unless the Secretary of Energy grants, on a case-by-case basis, a waiver to allow for such a deviation. The Secretary may not delegate the authority to grant such a waiver.

(b) At least 60 days before a contract award, amendment, or modification for which the Secretary intends to grant such a waiver, the Secretary shall submit to the Subcommittees on Energy and Water Development of the Committees on Appropriations of the House of Representatives and the Senate a report notifying the subcommittees of the waiver and setting forth the reasons for the waiver.

SEC. 303. None of the funds appropriated by this Act or any prior appropriations Act may be used to—

(1) develop or implement a workforce restructuring plan that covers employees of the Department of Energy; or

(2) provide enhanced severance payments or other benefits for employees of the Department of Energy; under section 3161 of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484; 106 Stat. 2644; 42 U.S.C. 7274h).

SEC. 304. None of the funds appropriated by this Act or any prior appropriations Act may be used to augment the \$29,900,000 made available for obligation by this Act for severance payments and other benefits and community assistance grants under section 3161 of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484; 106 Stat. 2644; 42 U.S.C. 7274h).

SEC. 305. None of the funds appropriated by this Act or any prior appropriations Act may be used to prepare or initiate Requests For Proposals (RFPs) for a program if the program has not been funded by Congress.

(TRANSFERS OF UNEXPENDED BALANCES)

SEC. 306. The unexpended balances of prior appropriations provided for activities in this Act may be transferred to appropriation accounts for such activities established pursuant to this title. Balances so transferred may be merged with funds in the applicable established accounts and thereafter may be accounted for as one fund for the same time period as originally enacted.

SEC. 307. Notwithstanding 41 U.S.C. section 254c(a), the Secretary of Energy may use funds appropriated by this Act to enter into multiyear contracts for the acquisition of property or services without obligating the estimated costs associated with any necessary cancellation or termination of the contract. The Secretary of Energy may pay costs of termination or cancellation from—

(1) appropriations originally available for the performance of the contract concerned;

(2) appropriations currently available for procurement of the type of property or services concerned, and not otherwise obligated; or

(3) funds appropriated for those payments.

SEC. 308. None of the funds in this Act may be used to dispose of transuranic waste in the Waste Isolation Pilot Plant which contains concentrations of plutonium in excess of 20 percent by weight for the aggregate of any material category on the date of enactment of this Act, or is generated after such date.

SEC. 309. CHANGE OF NAME OF THE OFFICE OF ENERGY RESEARCH. (a) IN GENERAL.—Section 209 of the Department of Energy Organization Act (42 U.S.C. 7139) is amended—

(1) in the section heading, by striking "ENERGY RESEARCH" and inserting "SCIENCE"; and

(2) in subsection (a), by striking "Energy Research" and inserting "Science".

(b) CONFORMING AMENDMENTS.—

(1) TABLE OF CONTENTS.—The table of contents in the first section of the Department of Energy Organization Act (42 U.S.C. prec. 7101) is amended by striking the item relating to section 209 and inserting the following:

"Section 209. Office of Science."

(2) REFERENCES IN OTHER LAW.—Each of the following is amended by striking "Energy Research" and inserting "Science":

(A) The item relating to the Director, Office of Energy Research, Department of Energy in section 5315 of title 5, United States Code.

(B) Section 2902(b)(6) of title 10, United States Code.

(C) Section 406(h)(2)(A)(v) of the Public Health Service Act (42 U.S.C. 284a(h)(2)(A)(v)).

(D) Sections 3167(3) and 3168 of the Department of Energy Science Education Enhancement Act (42 U.S.C. 7381d(3), 7381e).

(E) Paragraphs (1) and (2) of section 224(b) of the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10204(b)).

(F) Section 2203(b)(3)(A)(i) of the Energy Policy Act of 1992 (42 U.S.C. 13503(b)(3)(A)(i)).

SEC. 310. MAINTENANCE OF SECURITY AT DOE URANIUM ENRICHMENT PLANTS.—Section 3107(h) of the USEC Privatization Act (42 U.S.C. 2297h-5(h)) is amended in paragraph (1), by striking "an adequate number of security guards" and inserting "all security police officers"; and by inserting the following paragraph:

"(2) FUNDING.—

"(A) The costs of arming and providing arrest authority to the security police officers required under paragraph (1) shall be paid as follows:

"(i) the Department of Energy (the "Department") shall pay the percentage of the costs equal to the percentage of the total number of employees at the gaseous diffusion plant who are (I) employees of the Department or the contractor or subcontractors of the Department or (II) employees of the private entity leasing the gaseous diffusion plant who perform work on behalf of the Department (including employees of a contractor or subcontractor of the private entity), and

"(ii) the private entity leasing the gaseous diffusion plant shall pay the percentage of the costs equal to the percentage of the total number of employees at the gaseous diffusion plant who are employees of the private entity (including employees of a contractor or subcontractor) other than those employees who perform work for the Department.

"(B) Neither the private entity leasing the gaseous diffusion plant nor the Department

shall reduce its payments under any contract or lease or take other action to offset its share of the costs referred to in subparagraph (A), and the Department shall not reimburse the private entity for the entity's share of these costs.

"(C) Nothing in this subsection shall alter the Department's responsibilities to pay the safety, safeguards and security costs associated with the Department's highly enriched uranium activities."

SEC. 311. None of the funds in this Act may be used by the Department of Energy to conduct pilot projects simulating external regulation unless the Nuclear Regulatory Commission, the Occupational Safety and Health Administration, and the appropriate State and local regulatory entities are included in the pilot projects.

SEC. 312. Of the amounts provided in this title under the heading, "Atomic Energy Defense Activities, Weapons Activities", \$57,000,000 shall not be available for obligation until September 30, 1999.

TITLE IV INDEPENDENT AGENCIES

APPALACHIAN REGIONAL COMMISSION

For expenses necessary to carry out the programs authorized by the Appalachian Regional Development Act of 1965, as amended, notwithstanding section 405 of said Act, for necessary expenses for the Federal Co-Chairman and the alternate on the Appalachian Regional Commission, for payment of the Federal share of the administrative expenses of the Commission, including services as authorized by 5 U.S.C. 3109, and hire of passenger motor vehicles, \$66,400,000, to remain available until expended.

DENALI COMMISSION

For expenses of the Denali Commission including the purchase, construction and acquisition of plant and capital equipment as necessary and other expenses, \$20,000,000, to remain available until expended, subject to enactment of authorization by law.

DEFENSE NUCLEAR FACILITIES SAFETY BOARD SALARIES AND EXPENSES

For necessary expenses of the Defense Nuclear Facilities Safety Board in carrying out activities authorized by the Atomic Energy Act of 1954, as amended by Public Law 100-456, section 1441, \$16,500,000, to remain available until expended.

NUCLEAR REGULATORY COMMISSION SALARIES AND EXPENSES

For necessary expenses of the Commission in carrying out the purposes of the Energy Reorganization Act of 1974, as amended, and the Atomic Energy Act of 1954, as amended, including official representation expenses (not to exceed \$15,000); \$465,000,000, to remain available until expended: Provided, That of the amount appropriated herein, \$17,000,000 shall be derived from the Nuclear Waste Fund: Provided further, That revenues from licensing fees, inspection services, and other services and collections estimated at \$444,800,000 in fiscal year 1999 shall be retained and used for necessary salaries and expenses in this account, notwithstanding 31 U.S.C. 3302, and shall remain available until expended: Provided further, That \$3,200,000 of the funds herein appropriated for regulatory reviews and other assistance provided to the Department of Energy and other Federal agencies shall be excluded from license fee revenues, notwithstanding 42 U.S.C. 2214: Provided further, That the sum herein appropriated shall be reduced by the amount of revenues received during fiscal year 1999 so as to result in a final fiscal year 1999 appropriation estimated at not more than \$20,200,000.

OFFICE OF INSPECTOR GENERAL

For necessary expenses of the Office of Inspector General in carrying out the provisions of the Inspector General Act of 1978, as amended, \$4,800,000, to remain available until expended: Provided, That the sum herein appropriated shall be reduced by the amount of revenues re-

ceived during fiscal year 1999 so as to result in a final fiscal year 1999 appropriation estimated at not more than \$0.

NUCLEAR WASTE TECHNICAL REVIEW BOARD SALARIES AND EXPENSES

For necessary expenses of the Nuclear Waste Technical Review Board, as authorized by Public Law 100-203, section 5051, \$2,600,000, to be derived from the Nuclear Waste Fund, and to remain available until expended.

TITLE V—GENERAL PROVISIONS

SEC. 501. None of the funds appropriated by this Act may be used in any way, directly or indirectly, to influence congressional action on any legislation or appropriation matters pending before Congress, other than to communicate to Members of Congress as described in section 1913 of title 18, United States Code.

SEC. 502. (a) PURCHASE OF AMERICAN-MADE EQUIPMENT AND PRODUCTS.—It is the sense of the Congress that, to the greatest extent practicable, all equipment and products purchased with funds made available in this Act should be American-made.

(b) NOTICE REQUIREMENT.—In providing financial assistance to, or entering into any contract with, any entity using funds made available in this Act, the head of each Federal agency, to the greatest extent practicable, shall provide to such entity a notice describing the statement made in subsection (a) by the Congress.

(c) PROHIBITION OF CONTRACTS WITH PERSONS FALSELY LABELING PRODUCTS AS MADE IN AMERICA.—If it has been finally determined by a court or Federal agency that any person intentionally affixed a label bearing a "Made in America" inscription, or any inscription with the same meaning, to any product sold in or shipped to the United States that is not made in the United States, the person shall be ineligible to receive any contract or subcontract made with funds made available in this Act, pursuant to the debarment, suspension, and ineligibility procedures described in sections 9.400 through 9.409 of title 48, Code of Federal Regulations.

SEC. 503. (a) None of the funds appropriated or otherwise made available by this Act may be used to determine the final point of discharge for the interceptor drain for the San Luis Unit until development by the Secretary of the Interior and the State of California of a plan, which shall conform to the water quality standards of the State of California as approved by the Administrator of the Environmental Protection Agency, to minimize any detrimental effect of the San Luis drainage waters.

(b) The costs of the Kesterson Reservoir Cleanup Program and the costs of the San Joaquin Valley Drainage Program shall be classified by the Secretary of the Interior as reimbursable or nonreimbursable and collected until fully repaid pursuant to the "Cleanup Program—Alternative Repayment Plan" and the "SJVDP—Alternative Repayment Plan" described in the report entitled "Repayment Report, Kesterson Reservoir Cleanup Program and San Joaquin Valley Drainage Program, February 1995", prepared by the Department of the Interior, Bureau of Reclamation. Any future obligations of funds by the United States relating to, or providing for, drainage service or drainage studies for the San Luis Unit shall be fully reimbursable by San Luis Unit beneficiaries of such service or studies pursuant to Federal Reclamation law.

SEC. 504. None of the funds made available in this or any other Act may be used to restart the High Flux Beam Reactor.

SEC. 505. Section 6101(a)(3) of the Omnibus Budget Reconciliation Act of 1990, as amended, (42 U.S.C. 2214(a)(3)) is amended by striking "September 30, 1998" and inserting "September 30, 1999".

SEC. 506. (a) Funds appropriated for "Nuclear Regulatory Commission—Salaries and Expenses" shall be available to the Commission for the following additional purposes:

- (1) Employment of aliens.
- (2) Services authorized by section 3109 of title 5, United States Code.
- (3) Publication and dissemination of atomic information.
- (4) Purchase, repair, and cleaning of uniforms.
- (5) Reimbursements to the General Services Administration for security guard services.
- (6) Hire of passenger motor vehicles and aircraft.
- (7) Transfers of funds to other agencies of the Federal Government for the performance of the work for which such funds are appropriated, and such transferred funds may be merged with the appropriations to which they are transferred.

(8) Transfers to the Office of Inspector General of the Commission, not to exceed an additional amount equal to 5 percent of the amount otherwise appropriated to the Office for the fiscal year. Notice of such transfers shall be submitted to the Committees on Appropriations.

(b) Funds appropriated for "Nuclear Regulatory Commission—Office of Inspector General" shall be available to the Office for the additional purposes described in paragraphs (2) and (7) of subsection (a).

(c) Moneys received by the Commission for the cooperative nuclear research program, services rendered to State governments, foreign governments, and international organizations, and the material and information access authorization programs, including criminal history checks under section 149 of the Atomic Energy Act of 1954 (42 U.S.C. 2169) may be retained and used for salaries and expenses associated with those activities, notwithstanding 31 U.S.C. 3302, and shall remain available until expended.

(d) Notwithstanding section 663(c)(2)(D) of Public Law 104-208, and to facilitate targeted workforce downsizing and restructuring, the Chairman of the Nuclear Regulatory Commission may use funds appropriated in this Act to exercise the authority provided by section 663 of that Act with respect to employees who voluntarily separate from the date of enactment of this Act through December 31, 2000. All of the requirements in section 663 of Public Law 104-208, except for section 663(c)(2)(D), apply to the exercise of authority under this section.

(e) Subsections (a), (b), and (c) of this section shall apply to fiscal year 1999 and each succeeding fiscal year.

(TRANSFER OF FUNDS)

SEC. 507. FEDERAL PAYMENT TO THE DISTRICT OF COLUMBIA, CRIMINAL JUSTICE SYSTEM.—Of the amounts appropriated as a Federal payment under the District of Columbia Appropriations Act, 1998, to the Pretrial Services, Defense Services, Parole, Adult Probation and Offender Supervision Trustee, \$1,700,000 are hereby transferred to the District of Columbia Courts for court operations.

DESIGNATION OF VIC FAZIO YOLO WILDLIFE AREA
SEC. 508. The wetlands located in Yolo County, California, and known as the Yolo Basin Wetlands, shall be known and designated as the "Vic Fazio Yolo Wildlife Area". Any reference in law, map, regulation, document, paper, or other record of the United States to the wetlands shall be deemed to be a reference to the "Vic Fazio Yolo Wildlife Area".

DALE BUMPERS WILDLIFE RESOURCES PROTECTION ACT

SEC. 509. The Arkansas Wilderness Act of 1984 (Public Law 98-508, 98 Stat. 2349) is amended by adding at the end thereof the following new section:

"SEC. 8. RECOGNIZING THE CONTRIBUTIONS OF SENATOR DALE BUMPERS.

"(a) DEDICATION.—The nine areas in the State of Arkansas comprising approximately 91,100 acres designated as components of the National Wilderness Preservation System pursuant to this Act are hereby dedicated to United States Senator Dale Bumpers in recognition of

his leadership and outstanding contributions to the designation of wilderness in the State of Arkansas and to the protection and preservation of natural resources for the benefit of the people of the United States.

"(b) **SHORT TITLE.**—In further recognition of his efforts to protect wilderness resources in the State of Arkansas, this Act shall, upon enactment of this section, be known as the 'Dale Bumpers Wilderness Resources Protection Act'.

"(c) **PUBLIC NOTIFICATION.**—Not later than 180 days after the date of enactment of this section, the Secretary of Agriculture, acting through the Chief of the Forest Service, shall take such actions as may be necessary to recognize the contributions of Senator Dale Bumpers to the preservation of wilderness in the State of Arkansas. Such actions shall include, but not be limited to, appropriate signs and other materials, commemorative markers, maps, interpretive programs or other means as will adequately inform the public of the efforts of Senator Bumpers to preserve and protect National Forest wilderness areas in the State of Arkansas."

This Act may be cited as the "Energy and Water Development Appropriations Act, 1999".

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENT OF
THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4060) making appropriations for energy and water development for the fiscal year ending September 30, 1999, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effects of the action agreed upon by the managers and recommended in the accompanying conference report.

The language and allocations set forth in House Report 105-581 and Senate Report 105-206 should be compiled with unless specifically addressed to the contrary in the conference report and statement of the managers. Report language included by the House which is not contradicted by the report of the Senate or the conference, and Senate report language which is not contradicted by the report of the House or the conference is approved by the committee of conference. The statement of managers, while repeating some report language for emphasis, does not intend to negate the language referred to above unless expressly provided herein. In cases where both the House report

and Senate report address a particular issue not specifically addressed in the conference report or joint statement of managers, the conferees have determined that the House and Senate reports are not inconsistent and are to be interpreted accordingly. In cases in which the House or Senate have directed the submission of a report, such report is to be submitted to both House and Senate Committees on Appropriations.

Senate amendment: The Senate deleted the entire House bill after the enacting clause and inserted the Senate bill. The conference agreement includes a revised bill.

TITLE I

DEPARTMENT OF DEFENSE—CIVIL

The summary tables at the end of this title set forth the conference agreement with respect to the individual appropriations, programs, and activities of the Corps of Engineers. Additional items of conference agreement are discussed below.

DEPARTMENT OF THE ARMY

CORPS OF ENGINEERS—CIVIL

GENERAL INVESTIGATIONS

The conference agreement appropriates \$161,747,000 for General Investigations instead of \$162,823,000 as proposed by the House and \$165,390,000 as proposed by the Senate.

The conference agreement includes \$100,000 for a reconnaissance study of flood control and related purposes along Burnt Corn Creek and Murder Creek in the vicinity of Brewton and East Brewton, Alabama.

The conference agreement includes \$100,000 for a reconnaissance study of the City of Folsom, California, project, as authorized by Section 503 of the Water Resources Development Act of 1996.

The conference agreement includes final year funding to conclude demonstration studies on the seismic reliability of public infrastructure in California.

The conferees direct that the funds provided for the Delaware Bay Coastline, Delaware and New Jersey, project be distributed as follows: \$119,000 for the Villas and Vicinity portion; \$100,000 for the Roosevelt/Lewes Beach portion; and \$200,000 for the Port Mahon portion of the project.

The conference agreement includes \$100,000 for a reconnaissance study of the efficiency of existing water systems serving sugar cane plantations and surrounding communities in the State of Hawaii.

The conference agreement does not include funding for the Panther Creek, Kentucky, project in the General Investigations account. Funding for this project has been provided in the Construction, General account, under the Section 205 Small Flood Control Projects program of the Corps of Engineers.

The conference agreement includes \$113,000 for the Absecon Island element of the Brigantine Inlet to Great Egg Harbor Inlet, New Jersey, project.

The conferees direct that the funds provided for the Raritan Bay to Sandy Hook Bay, New Jersey, project be distributed as follows: \$225,000 for the Cliffwood Beach element; \$325,000 for the Union Beach element; \$100,000 for the Leonardo element; and \$100,000 for the Port Monmouth element of the project.

The conference agreement includes \$100,000 for a reconnaissance study of flood control and related purposes within the Woodbridge and Rahway river basins in New Jersey.

The conference agreement includes \$500,000 for a feasibility study of the Packery Channel, Corpus Christi, Texas, project.

The conference agreement includes \$100,000 for a reconnaissance study as directed by the Water Resources and Development Act of 1996 to determine the minimum safe height for levees along the Columbia River in the Tri-Cities area.

The conference agreement includes \$100,000 for a reconnaissance study of flooding problems in the Skokomish River Basin, Washington.

The conference agreement includes \$27,000,000 for Research and Development as proposed by the House instead of \$30,000,000 as proposed by the Senate. Of the amount provided, \$750,000 is for the Zebra Mussel Research Program.

The conferees have included language in the bill earmarking funds for the following projects in the amounts specified: Delaware Bay Coastline, Delaware and New Jersey, \$419,000; Tampa Harbor, Alafia Channel, Florida, \$200,000; Barnegat Inlet to Little Egg Harbor Inlet, New Jersey, \$322,000; Brigantine Inlet to Great Egg Harbor Inlet, New Jersey, \$113,000; Great Egg Harbor Inlet to Townsend's Inlet, New Jersey, \$200,000; Lower Cape May Meadows—Cape May Point, New Jersey, \$100,000; Manasquan Inlet to Barnegat Inlet, New Jersey, \$300,000; Raritan Bay to Sandy Hook Bay, New Jersey, \$750,000; and Townsend's Inlet to Cape May Inlet, New Jersey, \$250,000.

The conference agreement deletes funds earmarked in the Senate bill for the Atlanta Watershed, Atlanta, Georgia, project.

The conference agreement deletes language contained in the Senate bill providing funds for Rehoboth and Dewey Beaches, Delaware. The amount appropriated for General Investigations includes \$150,000 for this element of the Delaware Coast from Cape Henlopen to Fenwick Island, Delaware, project.

The conference agreement deletes language contained in the Senate bill providing funds for Fort Pierce Shore Protection, Florida. This project has been funded in the Construction, General account.

The conference agreement deletes language contained in the Senate bill providing funds for the Lido Key Beach, Florida, project. The amount appropriated for General Investigations includes \$268,000 for this project. The conference agreement also deletes language contained in the Senate bill providing funds for the Paducah, Kentucky, project. The amount appropriated for General Investigations includes \$100,000 for a reconnaissance study of the project. The conference agreement also deletes language contained in the Senate bill providing funds for the Lake Pontchartrain Basin Comprehensive Study, Louisiana, project.

The conference agreement includes language proposed by both the House and Senate directing the Corps of Engineers to use \$700,000 of previously appropriated funds to continue the feasibility phase of the Red River Navigation, Southwest Arkansas, project.

The conference agreement includes language proposed by the House directing the Corps of Engineers to use \$500,000 to implement Section 211(f)(7) of the Water Resources Development Act of 1996 and to reimburse the non-Federal sponsor a portion of the Federal share of project costs for the Hunting Bayou, Texas, project, and language proposed by the House directing the Corps of Engineers to use \$300,000 to implement Section 211(f)(8) of the Water Resources Development Act of 1996 and to reimburse the non-Federal sponsor a portion of the Federal share of project costs for the White Oak Bayou, Texas, project.

CONSTRUCTION, GENERAL

The conference agreement appropriates \$1,429,885,000 for Construction, General instead of \$1,456,529,000 as proposed by the House and \$1,248,068,000 as proposed by the Senate.

The conference agreement includes \$585,000 for channel extension work at the Mobile Harbor, Alabama, project.

The conference agreement provides \$3,500,000 for the Red River Emergency Bank Protection, Arkansas, project. Using those funds, the Corps of Engineers is directed to proceed with the components of the project identified in the House and Senate reports.

The conferees direct the Corps of Engineers to complete a reevaluation report of the Sacramento River Deepwater Ship Channel, California, project using available funds.

Funds provided for the Sacramento River Bank Protection Project in California will permit the Corps of Engineers to complete reinforcement and protection work on a five-mile section of Reclamation District 108's so-called Back Levee, the left bank of the Colusa Basin Drain.

The conferees direct that none of the funds provided for the Dade County, Florida, project shall be used for the acquisition of foreign source materials for the project unless the Secretary of the Army provides written certification to the Committees on Appropriations that domestic sources of materials are not available.

It is the intent of conferees that the Secretary of the Army, acting through the Chief of Engineers, use appropriations for the Chicago Shoreline, Illinois, project for construction and reimbursement to the non-Federal interest for the Federal share of any costs incurred by the non-Federal interest in reconstructing the revetment structures protecting Solidarity Drive in Chicago completed prior to execution of the Project Cooperation Agreement due to emergency circumstances associated with the potential collapse of existing revetment. It is the intent of the conferees that design, engineering, contracting and construction management of the Chicago Shoreline, Illinois, project be carried out directly by the Secretary of the Army, acting through the Chief of Engineers, except for these segments authorized in subsections 101(a)(12)(A) and (B) of Public Law 104-303.

The conferees remain supportive of the Des Plaines Wetlands Demonstration, Illinois, project and understand that sufficient funds will be carried forward into fiscal year 1999 to meet project requirements for the coming year.

The conference agreement includes \$1,000,000 for construction of the Comite River, Louisiana, project.

The conference agreement includes \$3,800,000 for the Mississippi River, Gulf Outlet, Louisiana, project. The Corps of Engineers is directed to use these funds to begin construction of, and implementation of the community impact mitigation plan for, the Inner Harbor Navigation Canal Lock replacement element of the project.

The conference agreement includes \$6,200,000 for the Jackson County, Mississippi, environmental infrastructure project as authorized by section 504 of the Water Resources Development Act of 1996. Because of the importance of this project, the Corps of Engineers is encouraged to include within the terms of the local cooperation agreement for construction the determination that all work completed after January 17, 1995 by non-Federal interests which is compatible with the project shall be considered part of the project and may be credited by the Secretary toward the non-Federal share of the cost of the project. Such work shall include those activities addressed by the Corps of Engineers conceptual design review report dated June 30, 1994.

The conferees would not oppose the execution of a contract for the Pascagoula Harbor, Mississippi, phase II dredging project that includes modifications for the extension of Bayou Cassotte.

The conference agreement includes a total of \$38,500,000 for the Levisa and Tug Forks of

the Big Sandy River and Upper Cumberland River, West Virginia, Virginia and Kentucky, project. These funds are to be distributed as follows: \$10,000,000 for the Harlan/Clover Fork, Kentucky, element; \$1,000,000 for the Cumberland City/Harlan County, Kentucky, element; \$1,500,000 for the Williamsburg, Kentucky, element; \$5,000,000 for the Middlesboro, Kentucky, element; \$4,150,000 for the Pike County, Kentucky, element; \$3,850,000 for the Martin County, Kentucky, element; \$730,000 for the Town of Martin, Kentucky, element; \$920,000 for the Grundy, Virginia, element; \$300,000 for the Hatfield Bottom, West Virginia, element; \$3,400,000 for the Lower Mingo County (Kermit), West Virginia, element; \$4,500,000 for the McDowell County, West Virginia, element; \$1,475,000 for the Upper Mingo County, West Virginia, element; and \$1,675,000 for the Wayne County, West Virginia, element.

The conference agreement includes \$80,000,000 for the Columbia River Fish Mitigation, Washington, Oregon, and Idaho, project instead of \$7,758,000 as proposed by the House and \$95,000,000 as proposed by the Senate. Funds are provided for phase I only of the John Day Reservoir drawdown study as outlined in the scoping document and report of the Corps of Engineers dated February 22, 1998. Funds are also provided to continue the lower Snake River feasibility study and to continue ongoing construction activity.

The conference agreement includes \$11,200,000 for the Section 206 program. Using those funds, the Corps of Engineers is directed to proceed with the projects described in the House and Senate reports.

The conference agreement includes \$2,000,000 for the Section 103 program. Using those funds, the Corps of Engineers is directed to proceed with the project described in the House report.

The conferees recognize the serious erosion problems being experienced on the east end of Dauphin Island, Alabama. To counter this threat to property and habitat, the conferees urge the U.S. Army Corps of Engineers, acting in coordination with non-Federal interests, to initiate a small beach restoration project on the east end of Dauphin Island, Alabama, utilizing alternative sand recapture technologies. Additionally, the conferees encourage the U.S. Army Corps of Engineers to work with non-Federal interests to begin near-shore disposal of appropriate dredge material on the east end of Dauphin Island, Alabama.

The conference agreement includes \$300,000 for the Section 208 program. Using those funds, the Corps of Engineers is directed to proceed with the projects described in the House report.

The conference agreement includes \$7,000,000 for the Section 14 program. Using those funds, the Corps of Engineers is directed to proceed with the projects described in the House and Senate reports.

The conference agreement includes \$34,800,000 for the Section 205 program. Using those funds, the Corps of Engineers is directed to proceed with the projects described in the House and Senate reports. Of the amount provided for the Section 205 program, \$100,000 is for the Port Indian, West Norriton Township, Pennsylvania, project; \$100,000 is for studies of flooding problems along the Mad River, New Haven River, Otter Creek, White River, Waits River and affected tributaries in Vermont; and \$1,550,000 is for the Cedar River, Washington, flood damage reduction project.

The conference agreement includes \$200,000 for the Section 111 program. Using those funds, the Corps of Engineers is directed to proceed with the project described in the House report.

The conference agreement includes \$6,000,000 for the Section 107 program. Using those funds, the Corps of Engineers is directed to proceed with the projects described in the House and Senate reports. The conferees strongly urge the Corps of Engineers to consider the concept design developed by the State of Minnesota in the planning and design of the Duluth (McQuade Road) Harbor, Minnesota, project.

The conference agreement includes \$11,000,000 for the Section 1135 program. Using those funds, the Corps of Engineers is directed to proceed with the projects described in the House and Senate reports. Of the amount provided for the Section 1135 program, \$500,000 is for the Green-Duwamish Ecosystem Restoration project and \$1,758,000 is for the Lower Hamm Creek, Washington, project.

The conference agreement includes language proposed by the House providing funds specifically for Part I of the Lock and Dam 24, Mississippi River, Illinois and Missouri, project instead of language proposed by the Senate providing funds to the project without reference to Part I.

The conferees have included language in the bill earmarking funds for the following projects in the amounts specified: Norco Bluffs, California, \$4,400,000; Panama City Beaches, Florida, \$6,000,000; Tybee Island, Georgia, \$1,200,000; Indiana Shoreline Erosion, Indiana, \$700,000; Indianapolis Central Waterfront, Indiana, \$4,000,000; Ohio River Flood Protection, Indiana, \$750,000; Harlan/Clover Fork, Williamsburg, Middlesboro, Martin County, Pike County and Town of Martin (Levisa and Tug Forks of the Big Sandy River and Upper Cumberland River), Kentucky, \$25,230,000; Southern and Eastern Kentucky, Kentucky, \$4,000,000; Lake Pontchartrain and Vicinity (Hurricane Protection), Louisiana, \$16,000,000; Lake Pontchartrain Stormwater Discharge, Louisiana, \$4,500,000; Southeast Louisiana, Louisiana, \$75,000,000; Jackson County, Mississippi, \$6,200,000; Natchez Bluff, Mississippi, \$4,000,000; Pascagoula Harbor, Mississippi, \$12,000,000; Passaic River Streambank Restoration, New Jersey, \$3,000,000; Lackawanna River, Olyphant, Pennsylvania, \$6,800,000; Lackawanna River, Scranton, Pennsylvania, \$40,551,000; South Central Pennsylvania Environment Improvement Program, Pennsylvania, \$39,000,000; Wallisville Lake, Texas, \$5,500,000; Virginia Beach, Virginia (Hurricane Protection), \$18,000,000; Upper Mingo County, Lower Mingo County, Wayne County, Hatfield Bottom, and McDowell County (Levisa and Tug Forks of the Big Sandy River and Upper Cumberland River), West Virginia, \$11,350,000; and West Virginia and Pennsylvania Flood Control, West Virginia and Pennsylvania, \$750,000.

The conference agreement includes language proposed by the House providing that, of the amount provided for the South Central Pennsylvania Environment Improvement Program, \$13,000,000 shall be available only for water-related environmental infrastructure and resource protection and development projects in Lackawanna, Lycoming, Susquehanna, Wyoming, Pike and Monroe counties in Pennsylvania in accordance with the purposes of subsection (a) and requirements of subsections (b) through (e) of section 313 of the Water Resources Development Act of 1992, as amended. These funds are provided for water-related environmental infrastructure projects at the following sites in the amounts specified: Athens Township, Bradford County, \$1,000,000; Central Bradford Progress Authority, Bradford County, \$2,000,000; Towanda Area Municipal Authority, Bradford County, \$450,000; South Abington Water Authority, Lackawanna County, \$350,000; Borough of Clark Summit, Lackawanna County, \$500,000; Covington Township

Sewer Authority, Lackawanna County, \$1,000,000; Moosic Borough, Lackawanna County, \$700,000; Williamsport Municipal Authority, Lycoming County, \$400,000; Lycoming County Water and Sewer Authority, \$2,700,000; Tobyhanna Township, Monroe County, \$200,000; Pike County \$3,000,000; and Sullivan County, \$700,000.

Of the remaining amount provided for the South Central Pennsylvania Environment Improvement Program, funds are provided for water-related environmental infrastructure projects at the following sites in the amounts specified: Broad Top Township; Bedford County, \$500,000; Chestnut Ridge Municipal Authority, Bedford County, \$2,000,000; Northern Blair County Regional Sewer Authority, Blair County, \$650,000; Burnside Borough, Clearfield County, \$50,000; Graham Township, Clearfield County, \$500,000; Curwensville Municipal Authority, Clearfield County, \$500,000; Glen Hope Water Association, Clearfield County, \$100,000; Irwona Municipal Authority, Clearfield County, \$500,000; West Decatur Township, Clearfield County, \$200,000; Guilford Township, Franklin County, \$500,000; Alexandria Borough/Porter Township, Huntingdon County, \$500,000; Mount Union, Huntingdon County, \$500,000; Huntingdon Borough, Huntingdon County, \$850,000; Orbisonia Borough, Huntingdon County, \$300,000; Mifflintown Municipal Authority, Juniata County, \$500,000; Juniata Terrace Borough, Mifflin County, \$500,000; Adams Township, Snyder County, \$350,000; and Middleburg Borough, Snyder County, \$1,000,000.

The conference agreement includes language proposed by the House directing the Secretary of the Army to incorporate the economic analyses for the Green Ridge and Plot Sections of the Lackawanna River, Scranton, Pennsylvania, project with the analysis for the Albright Street section of the project and cost-share and implement the combined sections as a single project. The conference agreement also includes language proposed by the House making funds previously appropriated for the restoration of the Lackawanna River Basin Corridor, Pennsylvania, available for other projects and activities on the Lackawanna River in Pennsylvania.

The conference agreement includes language proposed by the House directing the Secretary of the Army to implement Section 211(f)(6) of the Water Resources Development Act of 1996 and to reimburse the non-Federal sponsor for a portion of the Federal share of the project costs for the Brays Bayou, Texas, project. The conference agreement includes \$4,500,000 to implement this direction instead of \$6,000,000 as proposed by the House and \$3,000,000 as proposed by the Senate.

The conference agreement includes language proposed by the Senate that increases the appropriation ceiling for the Cook Inlet, Alaska, project and for the Natchez Bluff, Mississippi, project. In addition, the conference agreement includes language that increases the appropriation ceiling for the West Sacramento, California, project, and the Sacramento River, Glenn-Colusa Irrigation District, California, project.

The conference agreement includes language providing that the Corps of Engineers may use up to \$5,000,000, instead of \$8,000,000 as proposed by the Senate, to construct an emergency outlet from Devils Lake, North Dakota, to the Sheyenne River. The Corps may proceed with this project using available funds. The conference agreement deletes language proposed by the Senate designating the appropriation as an emergency. The conference agreement includes language proposed by the Senate subjecting the expenditure of funds on this project to a number of conditions. Although the conferees do not

specifically endorse the Senate report language regarding this project, they are prepared to consider providing additional resources if circumstances warrant.

The conference agreement includes language providing for the transfer of remaining General Investigations funds previously appropriated for the Juniata River, Pennsylvania, study and the Mussels Dam, Pennsylvania, project to Construction, General for use in specified components of the South Central Pennsylvania Environment Improvement Program.

The conference agreement deletes language proposed by the Senate directing the Corps of Engineers to use funds previously appropriated for the LaFarge Lake, Kickapoo River, Wisconsin, project to complete and transmit to the appropriated for the LaFarge Lake, Kickapoo River, Wisconsin, project to complete and transmit to the appropriate committees of Congress by January 15, 1999 a decision document on the advisability of undertaking activities authorized by Public Law 104-303.

The conference agreement deletes language proposed by the Senate earmarking funds for: a demonstration of sediment remediation technology; the Belle Isle Shoreline Erosion Protection, Michigan, project; the Riverfront Towers to Renaissance Center Shoreline Protection, Michigan, project; and the Great Lakes Basin Sea Lamprey Control, Michigan, project.

FLOOD CONTROL, MISSISSIPPI RIVER AND TRIBUTARIES, ARKANSAS, ILLINOIS, KENTUCKY, LOUISIANA, MISSISSIPPI, MISSOURI, AND TENNESSEE

The conference agreement appropriates \$321,149,000 for Flood Control, Mississippi River and Tributaries instead of \$312,077,000 as proposed by the House and \$313,234,000 as proposed by the Senate.

The conferees observe that Congress provided \$1,500,000 above the budget request in fiscal year 1998 for a grant study of Morganza, Louisiana, to the Gulf of Mexico. These funds were provided to the Corps of Engineers to expedite preconstruction engineering and design as recommended in the report issued in response to Section 425 of the Water Resources Development Act of 1996.

OPERATION AND MAINTENANCE, GENERAL

The conference agreement appropriates \$1,653,252,000 for Operation and Maintenance, General instead of \$1,637,719,000 as proposed by the House and \$1,667,572,000 as proposed by the Senate.

The Corps of Engineers is directed to use such available funds as are necessary to continue environmental studies and other activities related to evaluation of the water allocation formulas for the Apalachicola-Chattahooche-Flint (ACF) and Alabama-Coosa-Tallapoosa (ACT) River Basins.

The conference agreement includes \$24,993,000 for operation and maintenance of the McClellan-Kerr Arkansas River Navigation System, Arkansas, project. Within this amount, \$3,900,000 is for the acquisition and installation of tow haulage equipment for system locks.

The conference agreement includes \$5,200,000 for operation and maintenance of the Apalachicola Chattahoochee and Flint Rivers, Georgia, Alabama and Florida, project. The amount above the budget request is for model studies of the Chipola Cut-off to the Corley Slough reach of the river.

The amount above the budget request provided for the Kaskaskia River Navigation, Illinois, project is for the purpose described in the Senate Report.

The conference agreement includes \$4,677,000 for operation and maintenance of Wolf Creek Dam, Lake Cumberland, Ken-

tucky, project. The amount above the budget request is for the Corps of Engineers to complete construction of the debris rack at Lake Cumberland, along with landscaping, fencing and bank paving.

The conferees understand that failure of a containment dike threatens to severely impact critical habitat at the Blackwater Wildlife Refuge in Maryland and that the Corps of Engineers has been approached to offer assistance in resolving the problem. Given the potential impact to this significant wildlife resource, the Corps is encouraged to continue to work with interested parties and to use available authorities and resources as appropriate to assist in correcting the damaged dike.

The conferees direct the Corps of Engineers to repair the west breakwater at the Cedar River Harbor, Michigan, project, using funds previously appropriated for the project.

The conferees urge the Corps of Engineers to complete a section 111 report for the Ludington Harbor, Michigan, project to determine critical areas affected by the project, within available funds.

The conferees are aware of the deteriorated condition of the Owasco Seawall, which threatens the water supply of Auburn, New York. The Corps of Engineers is directed to conduct emergency repairs and rehabilitate the east seawall, utilizing fully such authorities as exist in law.

The conference agreement includes \$9,546,000 for operation and maintenance of the Garrison Dam, Lake Sakakawea, North Dakota, project. The amount above the budget request is for mosquito control activities at Lake Sakakawea.

The conferees have been informed of the potential need for mitigation dredging of the Charleston Harbor, South Carolina, navigation channel. The Corps of Engineers is directed to review the situation and to use available funds to perform additional dredging if safety conditions warrant.

The amount above the budget request for the Fort Randall Dam, Lake Francis Case, South Dakota, project is provided for the purposes described in the Senate Report.

The conference agreement includes \$10,900,000 for the Grays Harbor and Chehalis River, Washington, project. Of this amount, \$4,000,000 is for continued implementation of the south jetty maintenance project.

The conference agreement includes \$550,000 for the Tri-Cities Area, Washington, project. This funding is for NEPA and CERCLA costs associated with land conveyance pursuant to section 501(i) of Public Law 104-303, the Water Resources Development Act of 1996.

The conference agreement includes \$2,000,000 for the Willapa River and Harbor, Washington, project for the Corps of Engineers to determine the appropriate, cost effective, stable channel alignment that will eliminate current unacceptable impacts, and to initiate work once a decision is made. In determining the appropriate alignment, the Corps is to pay particular attention to the erosion damage occurring to State Highway 105, the importance of the highway for access and egress to the local area, and the potential cost of road relocation if the highway is destroyed or has to be rerouted.

The conferees are aware of a plan for the regionalization of water control management activities for projects operated by the Corps of Engineers. The conferees direct the Corps to brief the Committees on Appropriations of the House and Senate on the elements of such plan (and its impacts on current division and district operations and resources) prior to the plan's adoption.

The conference agreement deletes language proposed by the House providing for the derivation of funding from the Harbor Maintenance Trust Fund.

The conference agreement includes language in the bill proposed by the House earmarking \$4,200,000 for the repair of Chickamauga Lock in Tennessee. Within this amount, such funds as are necessary may be expended on studies associated with the repair work, including assessments, evaluations, or analyses of the existing lock. The conference agreement deletes language proposed by the House making the appropriation for Chickamauga Lock subject to authorization.

The conference agreement deletes language contained in the Senate bill providing funds for the Ponce DeLeon Inlet, Florida, project. The amount appropriated for Operation and Maintenance, General includes \$4,000,000 for this project.

The conference agreement deletes language contained in the Senate bill providing funds for the Delaware River, Philadelphia to the Sea, Pea Patch Island, Delaware and New Jersey, project. The amount appropriated for Operation and Maintenance, General includes \$750,000 for this project.

The conference agreement deletes language contained in the Senate bill providing funds for the Yaquina Bay and Harbor, North Marina Breakwater, Oregon, project. The amount appropriated for Operation and Maintenance, General includes \$1,069,000 for this project.

The conference agreement deletes language proposed by the Senate making available \$460,000 for the Omaha District to pay pending takings claims for flooding of property adjacent to the Missouri River. The conferees direct the Corps of Engineers to expeditiously process such claims and make prompt payment upon their disposition by settlement, adjudication, arbitration, or administrative process.

The conference agreement also deletes language proposed by the Senate providing funding for the Missouri River Between Fort Peck Dam and Gavins Point, South Dakota and Montana, project. The amount appropriated for Operation and Maintenance, General includes \$3,000,000 for this project.

The conference agreement includes language proposed by the Senate which provides that none of the funds appropriated in the Act shall be used for the purpose of acquiring land in Jasper County, South Carolina, in connection with the Savannah Harbor navigation project. The conference agreement deletes language proposed by the Senate providing funds to reimburse the Tri-Cities Power Authority for the reevaluation study of the Bluestone lake, West Virginia, project.

The conference agreement includes language directing the Secretary of the Army to undertake maintenance and repairs on the Allegheny River, Pennsylvania, project, using \$6,000,000 provided in Public Law 105-62 for extending the navigation channel on the Allegheny River, Pennsylvania, project to

provide passenger boat access to the Kittanning, Pennsylvania, Riverfront Park.

REGULATORY PROGRAM

The conference agreement appropriates \$106,000,000 for the Regulatory Program as proposed by the Senate instead of \$110,000,000 as proposed by the House.

The conference agreement deletes language proposed by the Senate providing funding for the National Contaminated Sediment Task Force.

FORMERLY UTILIZED SITES REMEDIAL ACTION PROGRAM

(INCLUDING TRANSFER OF FUNDS)

The conference agreement appropriates \$140,000,000 for the Formerly Utilized Sites Remedial Action Program (FUSRAP) as proposed by both the House and the Senate, and adopts with modifications the statutory provisions proposed by the Senate. The modifications to the language clarify the authority of the Corps of Engineers as the lead Federal agency; permit the use of recovered or contributed funds for credit in the FUSRAP account and use on projects; and permit the Department of Energy to continue to make payments in lieu of taxes for Federally-owned property where FUSRAP activities are conducted.

GENERAL EXPENSES

The conference agreement appropriates \$148,000,000 for General Expenses as proposed by the House and the Senate.

The conference agreement includes language proposed by the House making funding specifically available for headquarters support functions at the USACE Finance Center. The conference agreement deletes language proposed by the House prohibiting the use of funds to support an office of congressional affairs within the executive office of the Chief of Engineers. The conference agreement deletes language proposed by the Senate making funds available for the implementation of a plan to reduce the number of division offices of the Corps of Engineers.

The conferees are aware of a Defense Finance and Accounting Service initiative to assume the finance and accounting support functions which are now performed by the U.S. Corps of Engineers Finance and Accounting Center in Memphis, Tennessee. Because more than ninety-five percent of the Corps-wide operating budget is project funded, active oversight of accounting for operational and project costs is necessary to achieve maximum efficiency for project customers. To this end, the conferees are committed to the highest possible levels of finance and accounting support for the Corps. The Corps must continue to be a competitive engineering service provider, which necessitates full integration of financial and other business processes. This can be achieved only by retaining all of its finance and accounting

activities at a central location: the U.S. Army Corps of Engineers Finance and Accounting Center. To ensure that the proposed capitalization by the Defense Finance and Accounting Service fully recognizes Corps missions and responsibilities, the Chief of Engineers is directed to report to the Committees on Appropriations on the progress of capitalization once detailed plans have been formulated.

REVOLVING FUND

The conference agreement deletes language proposed by the Senate which permits the Corps of Engineers to use amounts in the Revolving Fund for an addition to the Alaska District's main office building on Elemendorf Air Force Base and which directs that the Revolving Fund shall be reimbursed from the benefitting appropriations by collections each year of user fees sufficient to repay the capital cost of the asset and to operate and maintain the asset. The conferees understand that the language is no longer required.

The conference agreement includes language proposed by the Senate authorizing the Secretary of the Army to use amounts in the Revolving Fund for activities associated with the relocation of the headquarters of the Corps of Engineers and requiring that the Revolving Fund be appropriately reimbursed.

GENERAL PROVISIONS

CORPS OF ENGINEERS—CIVIL

SEC. 101. The conference agreement includes a provision proposed by the Senate directing the Secretary of the Army, acting through the Chief of Engineers, to undertake work funded in the conference agreement using continuing contracts and providing that no fully allocated funding policy shall apply to projects for which funds are provided in the conference agreement.

SEC. 102. The conference agreement includes language proposed by the Senate providing that none of the funds made available in the conference agreement may be used to revise the Missouri River Master Water Control Manual if such revision provides for an increase in the springtime water release program during the spring heavy rainfall and snow melt period in states that have rivers draining into the Missouri River below the Gavins Point Dam.

Provision not included in the conference agreement.—The conference agreement deletes language proposed by the Senate authorizing and directing the Secretary of the Army to provide planning, design, and construction assistance to non-Federal interests in carrying out water related environmental infrastructure and environmental resources development projects in the State of Alaska and earmarking \$5,000,000 for such activities.

TITLE II

DEPARTMENT OF THE INTERIOR

CENTRAL UTAH PROJECT

CENTRAL UTAH PROJECT COMPLETION ACCOUNT

The conference agreement appropriates \$42,500,000 to carry out the provisions of the Central Utah Project Completion Act instead of \$40,948,000 as proposed by the House and \$44,948,000 as proposed by the Senate. The amount above the budget request is for Central Utah Project construction.

BUREAU OF RECLAMATION

The summary tables at the end of this title set forth the conference agreement with respect to the individual appropriations, programs, and activities of the Bureau of Reclamation. Additional items of conference agreement are discussed below.

WATER AND RELATED RESOURCES

The conference agreement appropriates \$617,045,000 for Water and Related Resources instead of \$596,254,000 as proposed by the House and \$671,869,000 as proposed by the Senate.

The conference agreement includes \$45,990,000 for the Central Arizona Project. The conferees direct that \$3,718,000 of the reduction below the budget request be distributed as described in the House report.

The conferees understand that the Department of the Interior has not responded to a request for exemption from the Reclamation Reform Act of 1982 submitted by the Harquahala Valley Irrigation District. The managers urge the Department to respond to this request as expeditiously as possible.

The conference agreement includes \$4,900,000 for the American River Division of the Central Valley Project for the Placer County Water Agency permanent replacement pumping facility.

The conference agreement includes \$2,250,000 for the Delta Division of the Central Valley Project for construction of the fish screen at the Contra Costa Canal intake at Rock Slough.

Of the amount provided for Miscellaneous Project Programs, Central Valley Project, \$5,500,000 is for Refuge Water Supply.

The conference agreement includes \$13,776,000 for resources management and development activities of the Sacramento River Division of the Central Valley Project. The conferees that the amount above the budget request be distributed as follows: an addition of \$850,000 for the integrated resources management program of the Colusa Basin Drainage District; an addition of \$600,000 for the Hamilton City Pumping Plant of the Glenn Colusa Irrigation District; and \$400,000 for the Winter-Run Chinook Salmon Captive Broodstock Program.

The conference agreement includes \$200,000 in final year funding for the Walker River Basin, Nevada, project.

The conference agreement includes \$2,100,000 for the Upper Rio Grande Basin Water Management and Technical Assistance Program in New Mexico. Of this amount, \$2,000,000 is for the confirmatory well drilling program described in the Senate report.

The conference agreement includes \$200,000 for a feasibility study of the Curry and Roosevelt County portion of the Ute Reservoir Pipeline project.

The conference agreement includes \$15,248,000 for the Endangered Species Recovery Implementation program. Of this amount, \$700,000 is for endangered species recovery activities in the San Juan River Basin.

The conference agreement includes \$6,000,000 for the Reclamation Recreation Management (Title XXVIII) program. Of this amount, \$2,500,000 is for projects in Colorado, including the Bonny Reservoir Project; \$2,000,000 is for recreation facility improvements in New Mexico, as described in the Senate report; and \$1,500,000 is for the Yuma West Wetlands Restoration project.

The conferees have not provided funding for the proposed Unscheduled Maintenance program. The conferees note, however, that generous funding has been provided for facilities operations, maintenance and rehabilitation for Bureau projects throughout the West. The conferees expect the Bureau to efficiently manage these resources and to re-order priorities and utilize its existing reprogramming authority to address unanticipated needs as they arise.

The conferees are aware that, contrary to the Department of the Interior's budget justification, the Department has failed to finalize an implementation plan for the Anadromous Fish Restoration Plan (AFRP) in fiscal year 1999. The conferees believe that the activities carried out under the AFRP should be based on sound science and carried out in a manner that is consistent with and complementary to the activities being undertaken by the CALFED program. Further, without such an implementation plan, the conferees are unable to determine whether or not the activities proposed to be carried out under the AFRP are ecologically justified as well as reasonable and prudent. The conferees direct the Department to provide the relevant committees of the House and Senate, as soon as possible the Department's AFRP implementation plan and an explanation of how each activity expected to be undertaken with funds appropriated in fiscal year 1999 is consistent with such implementation plan.

The Department is directed to conform to the following reprogramming guidelines. The Bureau is permitted to transfer, without prior Congressional approval and without regard to percentage limitation, not more than \$5,000,000 in any one case to provide adequate funds for settled contractor claims, increased contractor earnings due to accelerated rates of operations, and real estate deficiency judgments, provided that such reprogramming is necessary to discharge legal obligations of the Bureau of Reclamation.

As to each project within the Resources Management and Development category for which \$2,000,000 or more is available at the beginning of the fiscal year, the Bureau is permitted to transfer to such project in that fiscal year no more than fifteen percent of the amount available at the beginning of the fiscal year for such project, without prior Congressional approval. As to each project within the Resources Management and Development category for which less than \$2,000,000 is available at the beginning of the fiscal year, the Bureau is permitted to transfer to such project no more than \$300,000 in that fiscal year without prior Congressional approval.

The Bureau if further permitted to transfer funds within the Facility Operation, Maintenance and Rehabilitation category without prior Congressional approval and without regard to percentage or dollar limitation.

The Bureau may not transfer, without prior Congressional approval, more than \$500,000 from either the Facilities Operation, Maintenance and Rehabilitation category or the Resources Management and Development category to any project in the other category. The Bureau is prohibited from initiating any program, project or activity through an internal reprogramming action.

The conference agreement includes language proposed by the House and Senate providing that, of the total amount provided for Water and Related Resources, \$25,800,000 shall be derived by transfer of unexpended balances from the Bureau of Reclamation Working Capital Fund.

The conference agreement includes language providing for the transfer of \$45,990,000 to the Lower Colorado River Basin Development Fund instead of \$49,908,000 as proposed by the House and \$46,218,000 as proposed by the Senate.

The conference agreement includes language proposed by the Senate providing that funds available for expenditure for the Departmental Irrigation Drainage Program may be expended for site remediation on a non-reimbursable basis.

The conference agreement includes language proposed by the Senate to increase the authorized level of appropriations for Indian municipal, rural, and industrial features of the Garrison Unit Diversion project.

The conference agreement includes language proposed by the Senate providing \$3,600,000 to complete the McCall Area Wastewater Reclamation and Reuse, Idaho, project.

The conference agreement deletes language proposed by the Senate providing funding to study measures to increase the efficiency of existing water systems developed to serve sugar cane plantations and surrounding communities in the State of Hawaii. Funding for such a study has been included in the General Investigations account of the Corps of Engineers.

The conference agreement deletes language proposed by the Senate waiving the scheduled annual payments for fiscal years 1998 and 1999 under section 208 of Public Law 100-202.

The conference agreement includes language providing \$2,800,000 for the Tooele Wastewater Treatment and Reuse Project.

BUREAU OF RECLAMATION LOAN PROGRAM
ACCOUNT

The conference agreement appropriates \$8,421,000 for the Bureau of Reclamation Loan Program Account instead of \$12,425,000 as proposed by both the House and the Senate.

CENTRAL VALLEY PROJECT RESTORATION FUND

The conference agreement appropriates \$33,130,000 for the Central Valley Project Restoration Fund as proposed by the House instead of \$39,500,000 as proposed by the Senate.

The conference agreement includes language proposed by both the House and Senate which directs the Bureau of Reclamation to assess and collect the full amount of the additional mitigation and restoration payments authorized by section 3407(d) of Public Law 102-575.

CALIFORNIA BAY-DELTA ECOSYSTEM
RESTORATION

The conference agreement appropriates \$75,000,000 for the California Bay-Delta Ecosystem Restoration program as proposed by the House instead of \$65,000,000 as proposed by the Senate.

POLICY AND ADMINISTRATION

The conference agreement appropriates \$47,000,000 for Policy and Administration instead of \$46,000,000 as proposed by the House and \$48,000,000 as proposed by the Senate.

TITLE III

DEPARTMENT OF ENERGY

The summary tables at the end of this title set forth the conference agreement with respect to the individual appropriations, programs, and activities of the Department of Energy. Additional items of conference agreements are discussed below.

REPROGRAMMINGS

The conference agreement does not provide the Department of Energy with any internal reprogramming flexibility in fiscal year 1999 unless specifically identified by the House, Senate, or conference agreement. Any reallocation of new or prior year budget authority or prior year deobligations must be submitted to the House and Senate Committees on Appropriations in advance in writing and may not be implemented prior to approval by the Committees.

DEPARTMENT OF ENERGY CONSTRUCTION STANDARDS

The Department is directed to ensure that all nuclear facilities for which construction begins in the year 2000 and beyond, with the exception of those defense nuclear facilities and naval reactor facilities deemed by the Secretary of Energy to be critical to national security needs, are constructed in accordance with Nuclear Regulatory Commission (NRC) licensing standards. The Department should ensure that this requirement does not result in a program requirement to meet two separate sets of standards (both DOE and NRC), but should ensure a smooth transition for meeting NRC standards.

DEPARTMENT OF ENERGY REPORTING REQUIREMENTS

The conferees agree with the House report language which directs the Department to take certain actions and provide to the House and Senate Committees on Appropriations reports on the computer security and year 2000 computer problem, the Department of Energy organizational structure, the functional support cost system, and augmenting Federal staff.

CONTRACTOR TRAINING

The conferees agree with the House report language on excessive contractor training costs. The conferees are also aware of a recent Inspector General report indicating that the Department was not acquiring hazardous materials training in the most cost-effective manner. The conferees direct the Department to use the most cost-effective alternatives available to meet all training needs at Departmental sites.

INAPPROPRIATE USE OF APPROPRIATED FUNDS

Both the House and Senate included language citing the inappropriate use of funds by the Department. In response to congressional concerns, the Department conducted an internal review entitled: *A Review of the Department of Energy's Discretionary Financial Assistance Programs* which was prepared by the Deputy Assistant Secretary for Procurement and Assistance Management. This September 1997 report documented various shortcomings in the Department's procedures for awarding funds to certain outside groups, particularly to certain groups funded by the Office of Energy Efficiency and Renewable Energy. The conferees support the recommendations of the Department's report including the introduction of merit review and competitive procedures, and education of Department employees, contractors and financial recipients with regard to lobbying restrictions. All of these concerns have also been documented in a separate report prepared by the investigative staff of the Committee on Appropriations of the House of Representatives. The conferees commend the Department for taking an interest in these

long-standing problems and fully support the Department's internal efforts to correct procedures and improve management of these programs.

After careful consideration of the House and Senate positions, the conferees have decided that the following language should guide the Department of Energy's work with industry associations. The conferees conclude that, as a general rule, appropriated funds should not be used to underwrite the operating expenses of industry associations. The restriction should not be broadly interpreted by the Department to prevent the Department from securing the services of an association for appropriate discrete tasks. In the funding of specific tasks carried out by industry associations, the Department is directed to use merit review procedures and to observe government-wide rules for financial assistance, including rules governing the payment of overhead expenses.

Financial assistance activities for information dissemination and outreach activities conducted by industry associations shall be competed, and these awards shall be processed by Headquarters Procurement Operations or the Chicago or Idaho Operations Offices. The Department is expected to make substantial progress in fiscal year 1999 in the use of broad area solicitations and other appropriate mechanisms to facilitate increased competition for discretionary financial assistance. Any non-competitive financial assistance awards in excess of \$5,000 made by the Office of Energy Efficiency and Renewable Energy to trade associations or other not-for-profit groups for information dissemination or outreach activities from funds provided in this bill must be reviewed by the Assistant Secretary of Energy Efficiency and Renewable Energy. The Department shall apply these mechanisms to the extent practicable to any follow-on tasks or expansion of existing tasks under financial assistance agreements for information dissemination and outreach.

The conferees also share the Department's concerns about the structure of the Golden field office organization. In particular, the conferees are concerned about organizational arrangements under which contracting personnel report directly to project and administrative managers. While a "teaming" concept may be appropriate under certain circumstances, the conferees support the Department's statements that an independent financial assistance and contracting organization would provide clearer lines of authority and professional accountability to ensure sound grant processing and award decisions. Accordingly, the conferees direct that the financial assistance and contracting organization at the Golden field office be reorganized as an independent organization, separate from the organizations which it supports. This direction is consistent with the recommendation of the Department's procurement executive.

The conferees also support the Department's recommendation that the Department educate Department employees, contractors and recipients of Federal funds about statutory lobbying prohibitions. The conferees are very concerned about the lack of understanding of existing statutes including the Simpson-Craig amendment to the Lobbying Disclosure Act of 1995. This provision prohibits the award of Federal grants, contracts and financial assistance to 501(c)(4) organizations which engage in lobbying activities. The Department issued guidance in December 1997 to contractors and Departmental employees on lobbying prohibitions. The Department is directed to ensure that all program offices are aware of this guidance, and take all necessary steps to ensure its implementation.

COMPETING WITH PRIVATE SECTOR COMPANIES

The Department of Energy's laboratories are prohibited from competing with the private sector by numerous statutes and regulations including the Atomic Energy Act of 1954 and provisions in the Federal Acquisition Regulation regarding Federally Funded Research and Development Centers.

The conferees have received complaints that the Department of Energy has failed to enforce these provisions at the laboratories and other facilities, and that adequate recourse is not available to those that allege harm.

The conferees direct the Secretary of Energy to assess the statutory and regulatory limitations on laboratories and other Departmental entities allegedly competing with the private sector, and to ascertain what grievance mechanisms are available to the private sector. The Secretary is directed to provide this information to the Committees by March 1, 1999, and make such information readily available to the private sector.

GENERAL REDUCTIONS NECESSARY TO ACCOMMODATE SPECIFIC PROGRAM DIRECTIONS

In the event that specific program guidance contained in the House, Senate, or conference reports requires a general reduction of available funding, such reductions shall not be applied disproportionately against any program, project, or activity.

ENERGY SUPPLY

The conference agreement appropriates \$727,091,000 instead of \$882,834,000 as proposed by the House of \$786,854,000 as proposed by the Senate. The conference report includes \$3,000 for official reception and representation expenses for transparency activities as proposed by the House, instead of \$25,000 as proposed by the Senate. The conference report has provided funding on an annual basis as recommended by the House instead of two-year funding as provided by the Senate. The conference report does not include bill language stipulating certain amounts for various solar and renewable programs as provided in the Senate bill. The conference report does not include the \$1,500,000 provided in the Senate bill for expenses related to the U.S. membership in the Nuclear Energy Agency.

SOLAR AND RENEWABLE RESOURCES TECHNOLOGIES

The conference agreement appropriates \$365,905,000 instead of \$351,405,000 as proposed by the House or \$415,292,000 as proposed by the Senate.

Solar Building technology research.—The conference agreement includes \$2,900,000, instead of \$2,200,000 as proposed by the House or \$3,860,000 as proposed by the Senate. The conferees have provided \$100,000 to improve computer models that predict the reliability of solar systems made of new materials. The remainder of the funds are provided for technology development.

Photovoltaic systems research and development.—The conference agreement includes \$69,683,000 as proposed by the House instead of \$75,849,000 as proposed by the Senate. The conferees have provided \$2,883,000 for research to be managed by the Office of Science, the same as the amount in the budget request. Within the \$66,800,000 provided to the Office of Energy Efficiency and Renewable Energy, the conferees have provided \$27,000,000 for advanced materials and devices, \$16,000,000 for systems engineering and reliability, \$11,000,000 for fundamental research, \$9,000,000 for manufacturing research and development and \$1,500,000 for the PV Building Opportunities program. Within available funds, the conferees have included \$1,500,000 to support ongoing photovoltaic research done by the Southeast and Southwest

regional experiment stations. The conferees agree with the observations made in the House report, but have not included a prohibition regarding the Department's participation in the Million Solar Roofs Initiative. The conferees have included \$1,500,000 for work on financing mechanisms, measurement and evaluation, technical standards and infrastructure such as net metering capability in support of the partnership.

Solar thermal energy systems.—The conference agreement includes \$17,000,000, instead of \$17,100,000 as proposed by the House or \$21,618,000 as proposed by the Senate. The conferees have provided \$5,500,000 for thermal systems research, \$5,000,000 for dish/engine development, \$3,200,000 for power tower development, \$1,000,000 for the SOLMAT initiative and \$1,000,000 for systems and markets/industrial assistance. The conferees direct that the Department submit its plan to complete its participation in the Solar Two project with submission of the fiscal year 2000 budget request.

Biomass/biofuels research and developments.—The conference agreement includes \$99,949,000, instead of \$100,799,000 as proposed by the House or \$104,033,000 as proposed by the Senate. The conferees have provided \$27,199,000 for research to be managed by the Office of Science, the same as the amount in the budget request.

The conference agreement includes \$31,000,000 for power systems of which \$15,000,000 is provided for rural development, \$2,500,000 is provided for co-firing biomass with coal, \$750,000 for the Plumas county ethanol project, and \$1,000,000 is provided for demonstration of black liquor gasification. The recommendation includes \$41,750,000 for transportation of which \$4,000,000 is included for the Sacramento Valley ethanol project. The conference agreement also includes \$1,750,000 for the Gridley project which, combined with amounts provided in previous fiscal years, results in a total of \$5,000,000 available for the Gridley project. The conferees urge the Department to complete the Jennings, Louisiana, plant and Vermont gasifier projects as agreed upon with its partners.

The conference agreement includes \$300,000 for the Vermont methane energy production proposal and \$100,000 to evaluate the amount, distribution and best method of extraction and utilization of methane gas from the Sunrise Mountain landfill in Nevada.

The recommendation also includes \$2,500,000 for the Consortium for Plant Biotechnology Research, \$4,600,000 for feedstock development and \$2,500,000 for regional biomass each of which is to be equally derived from the power systems and transportation programs. The conferees have also provided \$3,000,000 for accelerated demonstration of Federally-sponsored research for renewable energy production and environmental remediation projects at the Michigan Biotechnology Institute. The Institute will work with the Department to identify and manage projects related to the mission of the Office of Energy Efficiency and Renewable Energy. Proposals will be subject to merit review and competition.

Wind energy research and development.—The conference agreement includes \$33,483,000, as proposed by the House, instead of \$38,548,000 as proposed by the Senate. The conferees have provided \$283,000 for research to be managed by the Office of Science, the same as the amount in the budget request. Within the \$33,200,000 provided to the Office of Energy Efficiency and Renewable Energy, \$10,700,000 is for applied research, \$16,400,000 is for turbine research, \$3,000,000 is for industry support and utility analysis, \$1,300,000 is for operations at the National Wind Technology Center; and a minimum of \$1,700,000,

the amount requested, is for certification and standards activities. The conferees have been assured that the certification program will be in place in fiscal year 1999. The conferees welcome the attainment of one of the goals of the wind energy program. In the event that funding requirements for certification exceed the amount requested, the Department may reduce funding for other non-Energy Research wind activities to supplement the \$1,700,000 provided for certification.

Renewable energy production incentive.—The conference agreement includes \$4,000,000, as proposed by the Senate instead of \$5,000,000 as proposed by the House.

Solar program support.—The conference agreement does not include funding for this new spending program proposed by the Administration. This is consistent with the proposal of the House. The Senate proposed \$7,000,000 for this program. The conferees have provided \$1,500,000 for electricity restructuring activities as part of the amount provided below for program direction.

International solar energy.—The conference agreement includes \$3,750,000 instead of \$500,000 as proposed by the House or \$5,088,000 as proposed by the Senate. Within this amount, \$2,500,000 is exclusively for the U.S. Initiative on Joint Implementation. Of this amount, \$1,250,000 is to be provided expeditiously to International Utility Efficiency Partnerships, Inc. (IUEP). IUEP shall competitively award projects continuing its leadership role in reducing carbon dioxide emissions using market-based mechanisms. The Department shall consolidate any international projects funded from other solar programs under the \$1,250,000 provided for joint implementation activities to be managed by the Department.

No funds provided in this or any prior Act are to be made available for the America's 21st Century or CORECT programs. The conferees have also provided \$1,250,000 for the Federal Energy Technology Center for design and siting analysis for an electron scrubbing demonstration project.

Solar technology transfer.—The conference agreement does not include funding for this new spending program proposed by the Administration. This is consistent with the proposal of the House. The Senate proposed \$680,000 for this program.

National Renewable Energy Laboratory (NREL).—The conference agreement includes \$2,000,000 as proposed by the House instead of \$5,000,000 as proposed by the Senate. The conferees have provided \$1,000,000 for infrastructure and general purpose equipment. The remaining \$1,000,000 is to be made available following submission of a program plan by the winner of the competition for the management and operating contract at NREL.

Geothermal technology development.—The conference agreement includes \$28,500,000 instead of \$27,500,000 as proposed by the House or \$31,250,000 as proposed by the Senate. The conferees have provided \$11,000,000 for exploration and production technology, \$5,000,000 for drilling technology and \$6,000,000 for energy conversion technology.

The conferees have provided \$6,500,000 for the geothermal heat pump deployment program as proposed by the House, a \$5,500,000 increase over the amount proposed by the Senate. The conferees note that fiscal year 1999 is the last year of funding for this program.

Hydrogen research and development.—The conference agreement includes \$24,008,000 instead of \$18,008,000 as proposed by the House or \$32,008,000 as proposed by the Senate. The conferees have provided \$3,008,000 for research to be managed by the Office of Science, the same as the amount in the budget request. The conferees have provided \$2,225,000 for the Hydrogen Fuel Cell Power

and Refueling Station in Nevada and \$350,000 for the Montana Trade Port Authority in Billings, Montana, to complete a resource assessment and feasibility study on construction of a solid waste hydrogen fuel cell manufacturing facility. The conference agreement does not include the Senate proposal to provide \$250,000 for gasification of switchgrass for use in fuel cells.

Hydropower.—The conference agreement includes \$2,000,000 as proposed by the House instead of \$4,000,000 as proposed by the Senate and an increase of \$1,250,000 over the amount provided last year. The amount provided is exclusively for cost-shared research and development of "fish-friendly" turbines.

Renewable Indian energy resources.—The conference agreement includes \$3,500,000 instead of \$4,000,000 as proposed by the Senate or no funds as proposed by the House. The conferees have provided \$1,000,000 for the Pyramid Creek hydroelectric project, \$1,000,000 for a diesel backup system at Sitka, Alaska; \$1,000,000 for the Power Creek hydroelectric project and \$500,000 for hydroelectric and transmission projects partially funded in fiscal year 1998.

Electric energy systems and storage.—The conference agreement includes \$39,500,000 instead of \$38,000,000 as proposed by the House or \$42,500,000 as proposed by the Senate. The conferees have provided \$32,500,000 for high-temperature superconducting research and development, \$4,500,000 for energy storage systems and \$2,500,000 to support a national laboratory/utility industry partnership to conduct research on reliability of the nation's electricity infrastructure including the impact of electricity restructuring on safety and reliability.

Federal buildings/remote power initiative.—The conference agreement includes \$4,000,000 instead of \$5,000,000 as proposed by the House and Senate. The conferees understand that the Department has been successful in identifying and funding proposals that met the criteria established last year by the Congress. The conferees direct that the funding for these programs be equally divided. Projects funded under the remote power and Federal buildings programs are required to meet a twenty-five year payback period.

Program direction.—The conference agreement includes \$17,100,000 instead of \$15,600,000 as proposed by the House or \$16,326,000 as proposed by the Senate. The Office of Energy Efficiency and Renewable Energy continues to lead the Department in the ratio of salaries and expenses to program dollars. All funding for support service contractors and Assistant Secretary/cross-cutting activities is provided in program direction. The conference agreement includes \$1,500,000 for electricity restructuring activities. The Department is directed to prepare and submit a program plan to the Committees on Appropriations describing this new program. The proposal should identify a discrete role the Department would play that would not be duplicative of services provided by the private sector, state governments or other Federal agencies. Within the amount provided, the conferees have included funds for technical assistance to states undergoing restructuring, including \$150,000 in support of restructuring activities of the California Energy Commission. The conferees support the Department's efforts to continue its work with electric utilities to facilitate voluntary, cost-effective means to reduce emissions from power generation and approve the use of limited funding from program direction for this purpose.

NUCLEAR ENERGY

The conference agreement appropriates \$283,966,000 instead of \$227,769,000 as proposed by the House or \$308,662,000 as proposed by

the Senate. The conferees have provided \$19,000,000 for the nuclear energy research initiative instead of \$24,000,000 as recommended by the Senate or \$5,000,000 as recommended by the House. The conferees have not included funding for the nuclear energy plant optimization program for which the Senate provided \$10,000,000 and the House provided no funds.

Advanced radioisotope power systems.—The conference agreement includes \$37,000,000 instead of \$40,500,000 as provided by the Senate and \$35,000,000 as provided by the House. The conferees continue to be concerned about the lack of interest the Department has shown in streamlining management, reducing the infrastructure, and reducing the extensive level of support service contractors in this program. The Department is directed to prepare a plan to streamline and reduce costs for this program. The plan is to be included with the fiscal year 2000 budget request.

University reactor fuel assistance and support.—The conference agreement includes \$11,000,000 instead of \$10,000,000 as provided by the Senate and \$12,000,000 as provided by the House. The conferees have provided \$4,500,000 for the nuclear engineering education research grant program and \$1,000,000 each for the university graduate fellowship and industry matching programs. The conferees note that the Department has recommended a 50% increase for Historically Black Colleges and Universities over the amount set aside in fiscal year 1997 and a new start to begin a pre-college nuclear science and technology program. The conferees include funding for these two programs at the same levels provided in fiscal year 1997.

Termination costs.—The conference agreement provides \$85,000,000 instead of \$81,150,000 as recommended by the House or no funding under this heading as recommended by the Senate. The Senate provided funding for these activities in two other budget lines: Facilities and Nuclear technology research and development. The conference agreement provides funding for these activities consistent with how funds have been provided in fiscal year 1998. The conferees have provided a total of \$45,000,000 for electrometallurgical-related activities including \$20,000,000 for nuclear technology research and development.

Fast Flux Test Facility.—The conference agreement includes a new line item for this facility. The conferees have provided \$30,000,000 instead of \$31,200,000 recommended by the House in the Non-Defense Environmental Management account or \$28,100,000 recommended by the Senate in the Facilities program included in the Energy Supply account.

Uranium programs.—The conference agreement includes \$49,000,000 instead of \$53,518,000 as proposed by the House or \$55,362,000 as proposed by the Senate. The recommendation reflects the elimination of increases requested in the budget request and acceptance of decreases.

The conferees urge the Secretary to implement a program to begin the stabilization and disposal of depleted uranium hexafluoride stockpiles located at the Paducah, Kentucky, and Portsmouth, Ohio gaseous diffusion plants, and at Oak Ridge, Tennessee. The conferees urge the Secretary of Energy to develop a plan consistent with the intent of Public Law 105-204.

The conferees are aware that the Department has signed a memorandum of agreement with the United States Enrichment Corporation (USEC) to transfer \$50,000,000 from USEC in the exchange for accepting the disposal of depleted uranium hexafluoride stockpiles, and an additional \$16,000,000 to cover the costs of storing USEC-generated depleted uranium hexafluoride canisters. The

conferees direct the Secretary to provide the House and Senate Committees on Appropriations with an accounting of how the Department intends to use this additional funding within 90 days of enactment of this legislation.

The conference agreement does not include language proposed by the House requiring submission of a report on the status of safeguards at the gaseous diffusion plants.

Isotope support.—The conference agreement includes \$21,500,000 instead of \$14,000,000 as proposed by the House or \$22,450,000 as proposed by the Senate. The Department is directed to submit its plan for privatizing the molybdenum-99 production activities to the Committees on Appropriations no later than December 31, 1998.

Program direction.—The conferees have provided \$24,700,000 which includes all direct and indirect funding for Office of Nuclear Energy employees, including those transferred to the Office of Nonproliferation and National Security. The conferees have included \$3,700,000 for all support service contracts in accordance with Departmental budget rules. The conferees have not stipulated the amount to be provided for employees transferred to the Office of Nonproliferation and National Security.

The conferees note that the Department has requested \$1,005,000 for travel which represents approximately \$5,500 per employee of the Office of Nuclear Energy. The conferees believe this amount to be excessive. In particular, the conferees are concerned about the unprecedented level of travel undertaken by the current Director of International Nuclear Safety Programs (formerly, the Director of Nuclear Energy). The conferees have not included any travel funds for the Director in fiscal year 1999. Any changes to the amounts provided require submission and approval of a reprogramming request.

ENVIRONMENT, SAFETY AND HEALTH

The conference agreement includes \$50,398,000 instead of \$46,000,000 recommended by the House or \$56,000,000 recommended by the Senate. The conferees have reduced the funding for support service contractors by \$5,000,000 instead of \$10,000,000 recommended by the House or no reduction as recommended by the Senate.

The Department is currently conducting pilot projects to determine the impacts of external regulation on various facilities. However, several of the pilot projects have included only the Nuclear Regulatory Commission (NRC) and not the Occupational Safety and Health Administration (OSHA) or affected State and local authorities. Since there are many issues involving the interface between NRC and OSHA and other State and local authorities as well as with DOE, the usefulness of these pilots to determine the full impacts of external regulation is limited. The Department is directed to include all affected regulatory authorities in all future pilot projects. The conferees have provided funding to support OSHA participation in these pilot projects.

ENERGY SUPPORT ACTIVITIES

Technical information management program.—The conference agreement includes \$8,600,000 instead of \$9,100,000 as proposed by the House or \$8,100,000 as proposed by the Senate.

Transfer of funds to the Occupational Safety and Health Administration.—The conference agreement includes \$1,000,000 to be transferred to the Occupational Safety and Health Administration (OSHA) for conducting pilot programs and other activities necessary to simulate the transition of regulatory authority over occupational safety and health at DOE facilities to OSHA.

With the funding provided, OSHA is to participate in all DOE external regulation pilot

projects. OSHA has declined to participate in several of the earlier pilot projects due to limited resources. This has severely limited the usefulness of the pilots.

Field offices.—The conference agreement provides \$104,127,000 instead of \$85,000,000 as proposed by the House or \$95,000,000 as proposed by the Senate. The conferees have provided funding for Federal employees at the Idaho field office in this account as proposed by the Senate.

Oak Ridge landlord.—The conference agreement includes \$11,000,000 as proposed by the House instead of \$12,500,000 as proposed by the Senate. The reduction from the budget request reflects the availability of \$1,500,000 as a result of the reprogramming approved by the Committees on Appropriations on March 16, 1998.

FUNDING ADJUSTMENTS

The conference report includes two funding adjustments. The \$47,905,000 adjustment represents the funding provided for renewable energy research programs managed by the Office of Energy Research and funded in the Science account. The conferees have included a prior year balance adjustment of \$50,000,000 as proposed by the Senate instead of \$31,535,000 as proposed by the House. The conferees have not included the general reduction of \$10,795,000 as proposed by the Senate.

NON-DEFENSE ENVIRONMENTAL MANAGEMENT

The conference agreement appropriates \$431,200,000 instead of \$466,700,000 as proposed by the House and \$418,254,000 as proposed by the Senate.

The conferees have provided funding for the Fast Flux Test Facility (FFTF) at Richland, Washington, in the Energy Supply account as proposed by the Senate, rather than in this account as proposed by the House.

The conference agreement provides an additional \$5,700,000 to accelerate cleanup at the Brookhaven National Laboratory. The conferees are aware of several smaller sites and laboratories that could benefit from additional funds and urge the Department to seek additional funding in fiscal year 2000 to accelerate the cleanup of these sites.

URANIUM ENRICHMENT DECONTAMINATION AND DECOMMISSIONING FUND

The conference agreement appropriates \$220,200,000 instead of \$225,000,000 as proposed by the House and \$196,827,000 as proposed by the Senate.

The conferees understand that an increase in the authorization for the Federal reimbursement for thorium mill tailings is necessary to raise the ceiling from \$65,000,000 to \$140,000,000. The conferees support this necessary increase in the Federal reimbursement for thorium mill tailings.

SCIENCE

The conference agreement appropriates \$2,682,860,000 for Science instead of \$2,399,500,000 as proposed by the House and \$2,634,207,000 as proposed by the Senate. The conference agreement deletes language proposed by the Senate earmarking funds for the University of Nevada Las Vegas.

High energy physics.—The conference agreement provides \$696,500,000 for high energy physics. This is the amount provided by the House and represents a \$3,000,000 increase over the budget request for facilities operations and a \$2,500,000 increase for research and technology over the amount requested by the Administration. The increase is provided for maximum use of university and laboratory-based user facilities.

Nuclear physics.—The conference agreement provides \$335,100,000 for nuclear physics. This is the amount provided by the House and represents a \$2,500,000 increase

over the amount requested by the Administration. The increase is provided for maximum use of university and laboratory-based user facilities.

Biological and environmental research.—The conference agreement includes \$443,600,000 instead of \$405,900,000 as recommended by the House or \$407,600,000 as recommended by the Senate. The conferees have included \$3,000,000 in addition to the amount in the budget request for the low-dose effects program for which an additional \$5,000,000 is provided in the Defense Environmental Management account. The conferees have provided \$10,500,000 only for the Institute of Molecular Biology and Medicine, to continue microbial genomics research initiated in fiscal year 1998. The conferees have also provided \$8,000,000 to Sacramento County as the Local Redevelopment Authority for medical research and educational development at the McClellan nuclear reactor center, in conjunction with the University of California—Davis.

The conferees have provided \$1,000,000 for the Gallo Institute of the Cancer Institute of New Jersey for regional prostate cancer research, education and treatment initiatives to develop model outreach and early diagnosis and intervention strategies, focusing on one of the highest incidence regions in the nation and of prostate cancer in minority men. The conference agreement also includes \$1,000,000 to begin planning for the marine mammal research and education center at the National Energy Laboratory in Hawaii. The conferees have also provided \$2,500,000 for the bone marrow transplantation/radioimmunotherapy demonstration project at the City of Hope National Medical Center in California.

The conference report includes \$10,000,000 for the creation of a program to develop technologies using advanced functional brain imaging methodologies, including magnetoencephalography, for conduct of basic research in mental illness and neurological disorders. The conference report includes \$2,000,000 for the State University (New York), Stony Brook, to create a comprehensive cancer institute to serve as a focal point (in conjunction with regional cancer centers, the Brookhaven National Laboratory and the Cold Springs Harbor Laboratory) for a concentrated, multi-disciplinary approach to basic and clinical research, detection and molecular analysis of cancer, and development of new diagnostics and therapies targeting cancer. The conference report includes \$1,000,000 for the design, planning and construction of an interdisciplinary science facility at the University of Alabama Tuscaloosa. The conference report includes \$1,000,000 for the continued construction of the Highlands University Science Center in New Mexico. The conference report includes \$7,000,000 to be evenly divided between the West Virginia University National Education and Technology Center and the University of South Carolina Medical Center to support the utilization of Positron Emission Tomography.

Basic energy sciences.—The conference agreement includes \$809,100,000 instead of \$779,100,000 as recommended by the House or \$836,100,000 as recommended by the Senate. The conferees have included \$7,000,000 for the Experimental Program to Stimulate Competitive Research, the same as the House-approved level and \$3,000,000 less than the amount provided by the Senate. The conference agreement also includes \$500,000 for research related to identification of trace element isotopes in environmental samples to be done at the University of Nevada Las Vegas.

Spallation Neutron Source.—The recommendation includes \$130,000,000 to begin

construction of a new spallation neutron source. The conferees have provided \$101,400,000 for line-item construction costs and \$28,600,000, the amount of the budget request, for related research and development. The total amount provided is a reduction of \$27,000,000 from the budget request and an increase of \$107,000,000 over the current fiscal year.

Computational and technology research.—The conference agreement includes \$143,000,000 instead of \$138,640,000 as recommended by the House or \$150,000,000 as recommended by the Senate. The conferees support the House provision regarding funding for the Next Generation Internet initiative. However, the conferees have provided \$5,000,000 more than the amount provided by the House for improved utilization of the Department's existing computing infrastructure. Funding is provided for unique Internet tools for technologies that will not be available in the commercial marketplace in any reasonable timeframe and to maintain existing connections to the university community that are supported in the present research network.

FUSION ENERGY SCIENCES

The conferees have provided a total of \$229,750,000 for fusion energy sciences, a \$1,590,000 increase over the amount in the budget request. The conference agreement includes \$223,300,000 for the fusion energy sciences program. Funding for this program has been provided in the Science account as recommended by the Senate instead of the Energy Supply account as recommended by the House. The conferees have provided up to \$8,450,000 for all program direction expenses related to the fusion program within the \$49,800,000 provided in the Science account for program direction. The conferees note that the Department continues to emphasize tokamak development at the expense of other promising technologies. The conferees continue to be very supportive of the increased emphasis on innovative confinement concepts and university-based experiments. The conferees encourage the Secretary to provide sufficient resources for these efforts. In particular, special emphasis should be placed on funding operations, upgrades, and enhanced design work on both existing and proposed alternative concept experiments at the proof-of-principle level, including an increase for inertial confinement.

International Thermonuclear Experimental Reactor (ITER).—The conferees note that the ITER agreement expired on July 21, 1998. For the past several years, Congress has been clear that the U.S. commitment to ITER extended only through fiscal year 1998. The Department is directed not to sign an extension of this agreement without the written consent of the authorizing and appropriations committees of the House and Senate. The conferees understand and support the value of international collaboration. The Department is encouraged to consider the possibility of utilizing the existing international fusion center in San Diego in future collaborations.

The conferees note that the description of ITER and ITER-related activities in the budget request is not comparable to the classification of these activities in fiscal year 1998, but support the orderly completion of research and development of components that can be completed in fiscal year 1999. For example, the conferees fully expect the Department to meet its commitment to the delivery and testing of the central solenoid model coil.

The conferees have included \$12,200,000 as directly related to completion of ITER-related activities, including funds to complete research and development in the base tech-

nology program and to provide for orderly ITER closeout costs. The Department must submit a reprogramming request if requirements exceed the \$12,200,000 provided.

Tokamak Fusion Test Reactor (TFTR).—In fiscal year 1997, Congress terminated funding for the TFTR. The conferees note that TFTR has ceased operation and that many parts of the TFTR facility will be re-used for the new National Spherical Torus Experiment. Currently, the Department is spending approximately \$4,000,000 annually for care-taking of the remaining TFTR components. The Department has no immediate plans for the decommissioning of the TFTR unit, proposing to continue care-taking expenses indefinitely. The conferees have been made aware of decommissioning proposals to complete decommissioning in three years, with estimated savings of \$25,000,000. The conferees direct the Department to prepare a reasonable, timely and cost-effective decommissioning plan and to submit a plan to begin decommissioning in the fiscal year 2000 budget request. The Department shall consult with the Princeton Plasma Physics Laboratory throughout the development of this plan.

University and Science Education.—The conferees have adopted the House provision to provide funding for the Laboratory Cooperative, National Science Bowl and Albert Einstein Distinguished Educator Fellowships programs within the amount provided for program direction. Consistent with action taken over the last two fiscal years, the conferees have not included funding for grade school curriculum development programs and other education initiatives included in the Department of Energy's budget request. The conferees continue to support the various programs offered through the nation's laboratories. The conferees encourage the Department to seek opportunities to support work such as that performed by the Science and Technology Alliance.

PROGRAM DIRECTION

The recommendation is \$49,800,000, instead of \$43,100,000 as proposed by the House or \$37,600,000 as proposed by the Senate. The conferees have provided \$45,300,000 for standard program direction activities including up to \$6,450,000 for salaries and expenses for the Office of Fusion Energy Sciences. The conferees have also provided an additional \$4,500,000 to fund the Laboratory Cooperative, National Science Bowl, and Albert Einstein Distinguished Educator Fellowships programs as proposed by the House. The conferees take this action to establish a legitimate funding mechanism for these activities.

FUNDING ADJUSTMENTS

The conference agreement includes four funding adjustments. The \$7,600,000 adjustment represents previously appropriated funds the Department has identified as surplus. The funds were provided as part of the closeout costs related to cancellation of the Superconducting Super Collider. The \$13,500,000 adjustment represents an estimate of the policy-related work requested as part of the Climate Change Technology Initiative. This adjustment is to be made exclusively to the Basic Energy Sciences and Biological and Environmental Research programs. The conference agreement includes a \$13,000,000 prior year balance adjustment as proposed by the Senate instead of no adjustment as proposed by the House. The conference agreement also includes a \$5,700,000 general reduction. To the extent practicable, the conferees direct that general reductions are not applied to operation of user facilities. The conferees have not included the general reduction of \$42,353,000 as proposed by the Senate.

NUCLEAR WASTE DISPOSAL

The conference agreement appropriates \$169,000,000 instead of \$160,000,000 as proposed by the House and \$190,000,000 as proposed by the Senate. The conference agreement changes the name of this account to "Nuclear Waste Disposal", and provides \$165,000,000 to be derived from the Nuclear Waste Fund to continue the repository program.

The conference agreement provides \$4,000,000 to be appropriated from the General Fund for a civilian research and development program to conduct a study of accelerator transmutation of waste (ATW) technology. The Department is to establish, in coordination with its laboratories, a road map for the development of ATW technology. The road map should identify the technical issues that must be resolved, a proposed time schedule and program to resolve these issues, and the estimated cost of such a program. The road map should also consider and propose collaborative efforts with other countries developing ATW technology and other programs developing accelerator technology. In addition, the report should include an assessment of the institutional challenges of this program, the impact this technology could have on the civilian spent nuclear fuel program, areas of development which could have benefits to other ongoing programs, and the estimated capital and operational life cycle costs to treat civilian spent nuclear fuel.

The conference agreement includes \$250,000 for the State of Nevada instead of \$4,875,000 as proposed by the Senate and no funds as proposed by the House. This funding will be provided to the Department of Energy which will reimburse the State for actual expenditures on appropriate scientific oversight responsibilities conducted pursuant to the Nuclear Waste Policy Act of 1982. These funds may not be used for salaries and expenses for State employees in the oversight office.

The conference agreement includes \$5,540,000 for affected units of local government as proposed by the Senate instead of no funds as proposed by the House. Funding for the affected local governments is to be allocated in the same proportion as was provided to each affected local government in fiscal year 1998.

The conference agreement includes \$500,000 for the University of Nevada-Las Vegas to manage data from scientific studies of Yucca Mountain. No funds have been earmarked to study canister aging and corrosion. The conference agreement includes a 10 percent reduction from the budget request for the management and administrative support service contractors at the Yucca Mountain Office and Headquarters. The House had proposed reducing all support service contracts by 10 percent.

Consistent with the requirement in Public Law 104-206, the conferees reiterate the importance of the timely completion of the Viability Assessment of the Yucca Mountain site and expect the Department to provide this assessment to the President and Congress during 1998. The Viability Assessment is a significant prerequisite to the national decision to accept high-level radioactive waste and spent fuel at a Federal facility.

DEPARTMENTAL ADMINISTRATION

The conference agreement appropriates \$200,475,000 for Departmental Administration instead of \$175,365,000 as proposed by the House and \$234,755,000 as proposed by the Senate. Funding of \$37,627,000 is to be transferred to this account from Other Defense Activities. Revenues of \$136,530,000 are estimated to be received in fiscal year 1999, resulting in a net appropriation of \$63,945,000.

The conference agreement includes bill language proposed by the House providing

additional amounts for cost of work for others provided that such increases are offset by revenue increases of the same or greater amount.

The conferees have provided \$35,000 for official reception and representation expenses of the Department of Energy as proposed by the Senate instead of \$5,000 as proposed by the House. The conferees expect the Department to be prudent in the use of these funds and to submit a report to the House and Senate Committees on Appropriations providing a detailed description of each expenditure from this account in fiscal year 1999.

The conference agreement provides reprogramming authority of \$500,000 or 5 percent, whichever is less, within the Departmental Administration account without submission of a reprogramming to be approved by the House and Senate Committees on Appropriations. No individual program account may be increased or decreased by more than this amount during the fiscal year using this reprogramming authority. This should provide the needed flexibility to manage this account. Congressional notification within 30 days of the use of this reprogramming authority is required. Transfers which would result in increases or decreases in excess of \$500,000 or 5 percent to an individual program account during the fiscal year require prior notification and approval from the House and Senate Committees on Appropriations.

The conferees direct the Department to develop guidelines for its overseas employees based on the guidelines in effect for employees of the Department of State.

INSPECTOR GENERAL

The conference agreement appropriates \$29,000,000 for the Inspector General instead of \$29,500,000 as proposed by the House and \$27,500,000 as proposed by the Senate.

WEAPONS ACTIVITIES

The conference agreement appropriates \$4,400,000,000 instead of \$4,142,100,000 as proposed by the House and \$4,445,700,000 as proposed by the Senate.

The conference agreement includes language proposed by the Senate providing that funding for any ballistic missile defense program undertaken by the Department of Energy for the Department of Defense must be provided in accordance with procedures established for Work for Others by the Department of Energy.

Stockpile stewardship.—The conference agreement supports funding for activities in the core stockpile stewardship program with the following specific adjustments. The accelerated strategic computing initiative (ASCI) program has been reduced by \$23,200,000 resulting in a total program level of \$305,900,000. The agreement includes the additional \$10,000,000 proposed by the House for the inertial fusion program to further development of high average power lasers.

Testing capabilities and readiness.—Up to \$8,000,000 is available for continued development and procurement of a dual stage gas gun to be located at the Nevada Test Site. The conferees are aware of the memorandum of agreement between the Department and the Nevada university and community college system and urge the Department to find mutually beneficial projects which can be conducted under this agreement.

Technology transfer.—The conference agreement provides \$45,000,000 for the technology transfer program. Any necessary program reductions should be applied proportionally.

Construction projects.—At the request of the Department, the conferees have reallocated \$1,800,000 provided by the House and Senate for project 99-D-107, the joint computational engineering laboratory, to operating expenses for the accelerated strategic computing initiative. Construction of the laboratory is now planned to begin in fiscal year 2001.

The conference agreement provides a total of \$15,000,000 for new construction projects in fiscal year 1999. The budget request for new construction starts was \$25,300,000. The conferees acknowledge the need for some new construction funding, but remain concerned that the Department has not yet resolved its serious project management deficiencies. Thus, none of the funds may be obligated for a project until an independent assessment validating the cost and schedule for the specific project has been completed and provided to the House and Senate Committees on Appropriations.

Stockpile management.—For core stockpile management activities, the conference agreement provides \$1,986,803,000, which includes the following adjustments to the budget request. Additional funding of \$6,500,000 is provided for handling uranium materials and infrastructure upgrades at the Y-12 plant in Oak Ridge, Tennessee; \$12,000,000 is provided to support advanced manufacturing and other capital investment needs at the Kansas City plant; \$17,500,000 is provided to support scheduled workload requirements and other stockpile management requirements at the Pantex plant in Amarillo, Texas; and \$5,000,000 is provided to support infrastructure and maintenance needs at the Savannah River Site.

None of the funds provided for new construction project starts may be obligated until an independent assessment validating the cost and schedule for the specific project has been completed and provided to the House and Senate Committees on Appropriations.

Tritium.—A total of \$167,000,000, an increase of \$10,000,000 over the budget request, is provided for continued research and development on a new source of tritium.

Program direction.—For program direction funding, the conference agreement provides \$250,000,000, a reduction of \$10,500,000 from the budget request. The conferees believe that further savings can be achieved through efficiencies from realignment efforts proposed in the Institute for Defense Analysis report on the Department's management structure for weapons activities. The conference agreement includes \$7,000,000 for the Los Alamos schools and \$3,000,000 for the Los Alamos Educational Foundation.

Funding adjustments.—The conference agreement includes the use of \$82,536,000 of prior year balances instead of \$305,436,000 as proposed by the House and \$50,000,000 as proposed by the Senate.

DEFENSE ENVIRONMENTAL RESTORATION AND WASTE MANAGEMENT

The conference agreement appropriates \$4,310,227,000 for Defense Environmental Restoration and Waste Management instead of \$4,358,554,000 as proposed by the House and \$4,293,403,000 as proposed by the Senate. Additional funding of \$1,038,240,000 is contained in the Defense Facilities Closure Projects account and \$228,357,000 in the Defense Environmental Management Privatization account, for a total of \$5,576,824,000 provided for all defense environmental management activities.

Site/Project Completion.—The conference agreement provides \$1,052,741,000 for sites and projects to be completed by 2006. The conference agreement provides an additional \$5,000,000 to process tritium-contaminated heavy water currently being stored at the Savannah River Site. The conferees recognize the importance of this project and appreciate this innovative way of doing business. The conferees urge the Department to do what is necessary in future years to bring this project to a successful conclusion.

Funding of \$5,000,000 has been provided for cleanup activities related to TA-21 at the

Los Alamos National Laboratory. The Department is directed to prepare a detailed project plan for the cleanup of TA-21 project which includes the cost and schedule for each of the activities to be conducted, have the plan independently assessed, and submit the plan with the fiscal year 2000 budget request.

At the request of the Department, the conference agreement moves \$4,512,000 from project 96-D-408, waste management upgrades, to project 93-D-187, high-level waste removal from waste tanks, at the Savannah River Site.

The conferees remain concerned about the high cost of temporary storage and management of low-level wastes that are ready for permanent disposal and believe that available technologies demonstrated and certified by the Department's Environmental Management program as cost-effective alternatives should, to the extent appropriate, receive priority funding to dispose of these wastes. The conferees are aware of the Department's efforts to replace costly programs like the Interim Waste Management Facilities for low-level mixed waste at Oak Ridge, Tennessee, and other sites, and encourage the Department to implement promptly replacement programs and alternatives.

Post 2006 Completion.—The conference agreement includes an additional \$7,000,000 for research and treatment of high level waste at Idaho; \$3,000,000 to support operational needs at the Waste Isolation Pilot Project; \$5,000,000 to reimburse the State of New Mexico; \$25,000,000 to support modifications to the Defense Waste Processing Facility in-tank precipitation process; and \$15,000,000 for increased tank farm operations and reactor decommissioning at the Hanford site. The conference agreement also includes \$5,500,000 for the hazardous materials management and emergency response training facility at Hanford.

The conference agreement does not include the proposal by the House for submission by the Department of a report on transportation of hazardous materials.

The conferees recognize that universities in South Carolina, Georgia, and Louisiana have provided valuable technological and research assistance to the Department's environmental cleanup program, and recommend that the Department continue using these institutions where possible.

The conference reports accompanying the fiscal year 1997 and 1998 Energy and Water Development Appropriations Acts urged the Department's Offices of Waste Management and Technology Development to undertake jointly research and development focused on higher risk, high pay-off modular in-can vitrification technology as an alternative or backup to achieve satisfactory cleanup results at a significantly lower cost. The conferees are aware of the Department's recent award of a contract in compliance with these recommendations and strongly urge the Department to continue to fund this important research and development work in fiscal year 1999 to ensure that its potential for lower cost cleanup may be determined at the earliest possible date.

The conference agreement includes \$350,000 to cover the cost of an on-line tritium monitor for the City of Savannah, Georgia.

Health effects studies.—The conferees have provided \$12,000,000 for worker and public health effects studies, instead of \$15,000,000 as proposed by the House and \$10,000,000 as proposed by the Senate. These funds are to be managed by the Office of Environment, Safety, and Health. Demands for funding by various groups to conduct worker and public health studies at each Department of Energy site are increasing. The conferees agree that all funding for Health and Human Services

(HHS) managed studies, either through the Center for Disease Control and Prevention or the Agency for Toxic Substances and Disease Registry shall be incorporated into a single memorandum of understanding with HHS, and that DOE and HHS will prepare a consolidated and coherent strategy which includes a public health agenda for each DOE site. All DOE-funded health studies and proposals shall be independently peer-reviewed, and consistent with the public health agenda for each site.

The conferees have deferred without prejudice funding to initiate the proposed Hanford Medical Monitoring program, but within the health effects studies funding have allocated \$2,000,000 for the Department to initiate a public information and education program.

Science and Technology Development.—The conference agreement provides \$247,000,000 for the technology development program including \$8,500,000 to support the Department's efforts to deploy cost-effective new technologies. Deployment of new technologies is a strategic activity affecting virtually all environmental management programs and sites, and should be strongly supported as a complex-wide program, not another initiative established and maintained in isolation in the technology development organization.

The conferees urge the Department to continue research on hazardous materials in aquatic environments that supports the technology focus areas in mixed waste characterization, treatment, and disposal of subsurface contaminants.

The conference agreement includes \$2,000,000 for the national pilot program for electronics recovery and recycling; up to \$2,000,000 to use a technology that will safely and effectively destroy the asbestos removed from Federal facilities during the decontamination and decommissioning process; and \$4,500,000 for the Diagnostic Instrumentation and Analysis Laboratory (DIAL).

Environmental science program.—The conference agreement provides \$47,000,000 for the environmental basic research science program, an increase of \$15,000,000 over the budget request which had included no funding for new proposals in fiscal year 1999. This increase includes \$5,000,000 for proposals to determine the biological effects of exposure to low doses of ionizing radiation. These proposals are to be coordinated with the program being conducted by the Office of Energy Research.

Risk Policy.—The conference agreement includes \$4,000,000 for the Consortium for Risk Evaluation and Stakeholder Participation (CRESP) and \$2,000,000 for the Consortium for Environmental Risk Evaluation (CERE).

Program direction.—The conferees have provided \$337,073,000 for the program direction account. The recommendation does not include the transfer of the Federal employees at the Idaho Operations Office. The reduction of \$9,126,000 from the budget request should be applied to support service contracts, travel, and other lower priority activities at Headquarters and in the field.

Economic development.—The conference agreement maintains the current policy that no cleanup funds are to be used for economic development activities. The conferees have provided \$29,900,000 in the worker and community transition program which was established and authorized to fund such activities, and expect all economic development activities to be funded from that program.

DEFENSE FACILITIES CLOSURE PROJECTS

The conference agreement appropriates \$1,038,240,000 for the Defense Facilities Closure Projects account as proposed by the House instead of \$1,048,240,000 as proposed by the Senate. The conferees expect the Depart-

ment to request adequate funds to keep each of these projects on a schedule for closure by 2006.

DEFENSE ENVIRONMENTAL MANAGEMENT PRIVATIZATION

The conference agreement provides \$228,357,000 for the environmental management privatization program instead of \$286,857,000 as proposed by the House and \$241,857,000 as proposed by the Senate. The conference agreement includes \$100,000,000 for the tank waste remediation system (TWRS) project as proposed by the House. The remaining projects and the use of prior year balances are funded at the levels recommended by the Senate.

OTHER DEFENSE ACTIVITIES

The conference agreement appropriates \$1,696,676,000 for Other Defense Activities instead of \$1,761,260,000 as proposed by the House and \$1,658,160,000 as proposed by the Senate. Details of the conference agreement are provided below.

NONPROLIFERATION AND NATIONAL SECURITY

The conference agreement provides \$701,600,000 for nonproliferation and national security programs instead of \$696,600,000 as proposed by the House and \$696,300,000 as proposed by the Senate.

The conferees agree that the nonproliferation and verification research and development program currently executed at the nuclear weapons laboratories looks much like a static, generally unfocused, level of effort research program. The conferees direct the Department to initiate an external review of the projects being conducted, their progress to date, and their value to the overall needs of the program.

The conferees have deleted the bill language included by the Senate for the Initiatives for Proliferation Prevention (IPP) program and the nuclear cities initiative. However, from within available funds and prior year balances, the conference agreement includes \$25,000,000 for IPP and \$15,000,000 for the nuclear cities initiative.

The conference agreement includes an additional \$1,000,000 for a study of the vulnerabilities of security equipment; \$2,000,000 for the procurement of safety locks to meet Federal specifications; and \$500,000 for the continued development of the Raman spectroscopy technology.

No funds have been provided for development of the dielectric wall accelerator technology or for assistance to the Russian nuclear weapons dismantlement program to develop an emergency response capability.

Counterintelligence.—The conference agreement includes a total of \$15,641,000 to support the Department's new counterintelligence program. This is an increase of \$8,000,000 over the budget request. Needs in excess of this amount have been identified for computer security activities, but the conferees believe the Department should look to currently available computer resources to see if funds can be reallocated to these higher priority activities. If not, the Department should submit a reprogramming or supplemental budget request for fiscal year 1999.

Program direction.—The conference agreement provides \$86,900,000 for the program direction account. Reductions should be applied to the use of management and administration support service contractors throughout the organization and lower priority activities. None of these funds may be used to support the employees transferred from the Nuclear Energy office in fiscal year 1999. All funding for these employees has been provided in the Nuclear Energy program direction account.

The conference agreement includes \$600,000 for operation of the Department of Energy's

Moscow office. Collaborative efforts between the Department of Energy and the Russian Ministry of Atomic Energy on implementation of the Highly Enriched Uranium Agreement, plutonium disposition, and weapons dismantlement is one of the Department's highest priorities, and that effort should receive the full administrative support of the Department.

ENVIRONMENT, SAFETY AND HEALTH (DEFENSE)

The conference agreement provides \$91,500,000 for defense-related environment, safety and health activities instead of \$94,000,000 as proposed by the House and \$89,000,000 as proposed by the Senate. The reduction of \$2,500,000 from the budget request should be applied to the use of support service contractors.

The conferees have provided \$53,456,000 for worker and public health effects studies to be managed by the Office of Environment, Safety, and Health. This amount includes the budget request of \$41,456,000 in this account and \$12,000,000 in the Defense Environmental Management program. The conferees agree that all funding for Health and Human Services (HHS) managed studies, either through the Center for Disease Control and Prevention or the Agency for Toxic Substances and Disease Registry shall be incorporated into a single memorandum of understanding with HHS, and that DOE and HHS will prepare a consolidated and coherent strategy which includes a public health agenda for each DOE site. The agencies are directed to report to the Committees on Appropriations on the status of the implementation of the public health agenda by December 31, 1998. The final public health agenda for each site shall be provided to the Committees no later than September 30, 1999. The conferees strongly endorse the concept of peer-reviewed health effects studies, and direct that all DOE-funded health studies shall be independently peer-reviewed, and consistent with the public health agenda for each site.

WORKER AND COMMUNITY TRANSITION

The conference agreement provides \$29,900,000 for the worker and community transition program instead of \$29,800,000 as proposed by the House and \$40,000,000 as proposed by the Senate. Since there are no significant program funding decreases in the Department of Energy in fiscal year 1999, the conferees have reduced the funding allocated for enhanced severance benefits and local assistance grants. The conferees direct that no other Departmental funds be used to provide enhanced severance payments and other benefits under the provisions of Section 3161 of the National Defense Authorization Act of Fiscal Year 1993.

The conferees direct that none of the funds provided for this program be used for additional severance payments and benefits for Federal employees of the Department of Energy. Federal employees are covered by a multitude of laws which control employee benefits and protections during the downsizing of Federal agencies.

FISSILE MATERIALS DISPOSITION

The conference agreement provides the budget request of \$168,960,000 for fissile materials disposition, but reallocates \$5,000,000 from the pit disassembly and conversion facility project to operating expenses.

The conferees have not included the bill language proposed by the Senate earmarking \$5,000,000 for a joint U.S.-Russian development program of advanced reactor technology to dispose of Russian excess weapons-derived plutonium. However, the conference agreement includes \$5,000,000 for the joint U.S.-Russian development of gas reactor technology to dispose of excess weapons-de-

rived plutonium. Of this funding, \$2,000,000 is available for work to be performed in the United States by the Department of Energy and other U.S. contractors, and \$3,000,000 is to be expended for work in Russia. The \$3,000,000 shall be made available for work in Russia on the gas reactor technology on the condition and only to the extent that the Russian Federation matches these contributions with either comparable funding or contributions-in-kind.

The conferees have provided funds for this program in part because of the possibility that other countries will contribute to this effort. The conferees expect the Department and U.S. contractors to make every effort to gain commitments from other countries in this regard, and to seek private sector funding for continued future funding of this effort. Future support for this effort is contingent upon agreement on a U.S.-Russian agreement on the disposition of excess weapons-derived plutonium. The Department should report to the House and Senate Committees on Appropriations at the end of fiscal year 1999 on the progress which has been made in this program, the status of the matching funds or in-kind contributions from the Russian Federation and other countries, and the success of efforts to procure private sector funding for this effort.

The conferees have deleted bill language proposed by the Senate which limited the design and procurement activities for the mixed oxide fuel fabrication facility. The Department of Energy should proceed with preparations for plutonium disposition to include the design and licensing of key disposition facilities as well as qualification of mixed oxide fuel. The United States, however, should not proceed unilaterally to dispose of excess plutonium without parallel progress on the Russian side. No funds have been provided to initiate actual construction of plutonium disposition facilities without such an agreement.

NUCLEAR ENERGY (DEFENSE)

Due to severe funding constraints, the conference agreement provides \$30,000,000 for the international nuclear safety program to improve the safety of Soviet-designed nuclear reactors, a decrease of \$5,000,000 from the budget request.

NATIONAL SECURITY PROGRAMS ADMINISTRATIVE SUPPORT

The conference agreement provides \$37,627,000 for national security programs administrative support instead of \$75,000,000 as proposed by the House and no funding as proposed by the Senate.

NAVAL REACTORS

The conference agreement provides \$670,189,000, instead of \$681,500,000 as proposed by the House and \$665,500,000 as proposed by the Senate. An additional \$4,689,000 over the budget request has been provided to continue test reactor inactivation efforts and environmental cleanup activities.

DEFENSE NUCLEAR WASTE DISPOSAL

The conference agreement provides \$189,000,000 instead of \$190,000,000 as proposed by the House and \$185,000,000 as proposed by the Senate. Funding proposed by the Senate for the accelerator transmutation of waste program has been included in the non-defense portion of this bill.

POWER MARKETING ADMINISTRATIONS

ALASKA POWER ADMINISTRATION

The conference agreement does not include additional funding for the Alaska Power Administration as proposed by the House instead of \$5,000,000 as proposed by the Senate. Unobligated balances of the Alaska Power Administration shall be available to pay any remaining obligations of the Administration.

The conferees encourage the Department to reprogram any further unobligated balances.

The managers expect more than just a perfunctory report to Congress on the asset sales. Basic factual information should include: final sales price, terms of the sale, and identification of assets sold, as well as copies of primary sales documents. In addition, the report should include information on unexpected problems encountered and how those problems were resolved, lessons learned that could have improved the asset sales process, and any information that might be relevant to similar asset sales. The managers expect to receive the report prior to the end of fiscal year 1999, as stipulated in the authorizing legislation.

BONNEVILLE POWER ADMINISTRATION

The conferees take no position on the extension of the current levels of funding for mitigation of fish and wildlife impacts. The conference agreement does not include language proposed by the Senate pertaining to the authority of the Administrator to sell Federal power to an entity formed by existing regional public body and cooperative customers of Bonneville.

Independent Scientific Review Panel.—The conferees recommend that, with regard to Columbia Basin fish and wildlife projects, programs, or measures proposed in a Federal agency budget to be reimbursed by the Bonneville Power Administration, the Independent Scientific Review Panel should annually review such proposals, determine whether the proposals are consistent with the criteria in Section 4(h)(10)(D) of the Pacific Northwest Electric Power Planning and Conservation Act, make any recommendations that the Panel considers appropriate to make the project, program, or measure meet the criteria in that Section, and transmit the recommendations to the Northwest Power Planning Council no later than April 1 of each year. These Panel recommendations should be available to the public and should be subject to public comment.

The conferees further recommend that the Panel recommendations should be fully considered by the Northwest Power Planning Council when making its final recommendations of projects proposed by Federal agencies and reimbursed by the Bonneville Power Administration.

The conferees direct the Panel to submit its recommendations to the House and Senate Committees on Appropriations and relevant authorizing Committees no later than May 15 of each year. If the Northwest Power Planning Council does not incorporate a recommendation of the Panel in its recommendations, the Council should explain in writing its reasons for not accepting Panel recommendations.

SOUTHEASTERN POWER ADMINISTRATION

The conference agreement includes \$7,500,000, a reduction of \$1,000,000 from the amount provided by the House and Senate. The conferees have recently been made aware of an additional \$1,500,000 that will be available in fiscal year 1999 from funds carried over from fiscal year 1998.

SOUTHWESTERN POWER ADMINISTRATION

The conference agreement includes \$26,000,000, as proposed by the Senate instead of \$24,710,000 as proposed by the House.

WESTERN AREA POWER ADMINISTRATION

The conference agreement includes \$203,000,000, instead of \$205,000,000 as provided by the House or \$212,018,000 as provided by the Senate.

FALCON AND AMISTAD FUND

The conference agreement includes \$1,010,000, the same amount recommended by the Senate instead of \$970,000 as provided by the House.

FEDERAL ENERGY REGULATORY COMMISSION

The conference agreement includes \$167,500,000 instead of \$166,500,000 as recommended by the House or \$168,898,000 as recommended by the Senate. The conferees have provided the Commission with an increase of \$5,359,000 over the current fiscal year.

GENERAL PROVISIONS

DEPARTMENT OF ENERGY

SEC. 301. The conference agreement includes a provision proposed by the House and Senate that none of the funds may be used to award a management and operating contract unless such contract is awarded using competitive procedures, or the Secretary of Energy grants, on a case-by-case basis, a waiver to allow for such a deviation. At least 60 days before such action, the Secretary of Energy must submit to the House and Senate Committees on Appropriations a report notifying the Committees of the waiver and setting forth the reasons for the waiver. Section 301 does not preclude extension of a contract awarded using competitive procedures.

SEC. 302. The conference agreement includes a provision proposed by the House and Senate that none of the funds may be used to award, amend, or modify a contract in a manner that deviates from the Federal Acquisition Regulation, unless the Secretary of Energy grants, on a case-by-case basis, a waiver to allow for such a deviation. At least 60 days before such action, the Secretary of Energy must submit to the House and Senate Committees on Appropriations a report notifying the Committees of the waiver and setting forth the reasons for the waiver.

SEC. 303. The conference agreement includes a provision proposed by the House and Senate that none of the funds may be used to prepare or implement workforce restructuring plans or provide enhanced severance payments and other benefits and community assistance grants for Federal employees of the Department of Energy under section 3161 of the National Defense Authorization Act of Fiscal Year 1993, Public Law 102-484.

SEC. 304. The conference agreement includes a provision proposed by the House and Senate that none of the funds may be used to augment the \$29,900,000 made available for obligation for severance payments and other benefits and community assistance grants authorized under the provisions of section 3161 of the National Defense Authorization Act of Fiscal Year 1993, Public Law 102-484.

SEC. 305. The conference agreement includes a provision proposed by the House and Senate that none of the funds may be used to prepare or initiate Requests for Proposals for a program if the program has not been funded by Congress in the current fiscal year.

This provision precludes the Department from initiating activities for new programs which have been proposed in the budget request, but which have not yet been funded by Congress.

SEC. 306. The conference agreement includes a provision proposed by the House and Senate that permits the transfer and merger of unexpended balances of prior appropriations with appropriation accounts established in this bill.

SEC. 307. The conference agreement includes a provision allowing the Secretary of Energy to enter into multiyear contracts without obligating the estimated costs associated with any necessary cancellation or termination of the contract. This provides the Department of Energy with the same flexibility provided to the Department of Defense.

SEC. 308. The conference agreement modifies language proposed by the Senate that limited the types of waste that could be disposed of in the Waste Isolation Pilot Plant in New Mexico. None of the funds may be used to dispose of transuranic waste in excess of 20 percent plutonium by weight for the aggregate of any material category. At the Rocky Flats site, this provision applies to the five material categories addressed in the "Final Environmental Impact Statement on Management of Certain Plutonium Residues on Scrub Alloy Stored at the Rocky Flats Environmental Technology Site", Table S-2, Notice of Intent Categories.

SEC. 309. The conference agreement modifies language proposed by the Senate changing the name of the Office of Energy Research. The name of the office has been changed to "Science" instead of "Science Research" as proposed by the Senate.

SEC. 310. The conference agreement modifies language proposed by the Senate pertaining to maintenance of security at the DOE uranium enrichment plants. Costs of implementing this provision will be allocated between the Department of Energy and the United States Enrichment Corporation.

SEC. 311. The conference agreement modifies language proposed by the House in title V and requires the Department of Energy to include all appropriate regulatory entities when conducting pilot projects to simulate external regulation at Departmental facilities.

The Department is directed not to initiate any pilot projects to simulate external regulation of Departmental facilities which do not include the Nuclear Regulatory Commission (NRC), the Occupational Safety and Health Administration (OSHA), and the appropriate State and local entities. The Department has been conducting pilot projects to simulate the external regulation of its fa-

cilities. However, the pilot projects to date have included only the NRC, and not OSHA, or the appropriate State and local regulatory entities which could also have oversight of worker safety and health at Departmental facilities. The Department has touted its successful pilot project at the Lawrence Berkeley National Laboratory, but the pilot project was completely inadequate because it did not include the participation of OSHA or State and local entities. Thus, the pilot project failed to address many of the issues involving the interactions among all of these entities and the Department of Energy. Obvious questions were left unanswered in the pilot project.

The conferees direct the Department to address all of the issues involving OSHA and State and local regulation of worker safety and health at the Lawrence Berkeley National Laboratory in conjunction with NRC regulation. The Department should provide a report to the Committees on Appropriations by March 31, 1999, on the results of the comprehensive pilot project. Additionally, the Department is directed to initiate in fiscal year 1999 a pilot project for a multi-program non-defense laboratory such as Argonne National Laboratory or Brookhaven National Laboratory which includes a large accelerator project. The Department should not conduct simulations of external regulation at sites with weapons activities responsibilities.

SEC. 312. The conference agreement includes a provision delaying until September 30, 1999, the obligation of \$57,000,000 in the Atomic Energy Defense Activities, Weapons Activities appropriation account.

Provisions not adopted by the conferees

The conference agreement deletes language proposed by the House limiting the ability of Department of Energy facilities and laboratories to compete with the private sector. This provision has been addressed in report language.

The conference agreement deletes language proposed by the House limiting economic assistance payments to the State of New Mexico until the Waste Isolation Pilot Plant commences disposal operations.

The conference agreement deletes language proposed by the Senate permitting the Bonneville Power Administration to sell at wholesale rates to joint operating entities.

The conference agreement deletes language proposed by the Senate providing offsetting funding reductions in various appropriation accounts.

CONFERENCE RECOMMENDATIONS

The conference agreement's detailed funding recommendations for programs in title III are contained in the following table.

TITLE IV

INDEPENDENT AGENCIES

APPALACHIAN REGIONAL COMMISSION

The conference agreement includes \$66,400,000 for the Appalachian Regional Commission instead of \$65,900,000 as proposed by the House and \$67,000,000 as proposed by the Senate.

DENALI COMMISSION

The conference agreement includes language proposed by the Senate appropriating \$20,000,000 for the Denali Commission, amended to subject the appropriation to authorization enacted by law.

DEFENSE NUCLEAR FACILITIES SAFETY BOARD

The conference agreement appropriates \$16,500,000 for the Defense Nuclear Facilities Safety Board as proposed by the House instead of \$17,500,000 as proposed by the Senate.

NUCLEAR REGULATORY COMMISSION

SALARIES AND EXPENSES

The conference agreement includes \$465,000,000 instead of \$462,700,000 as recommended by the House or \$466,000,000 as recommended by the Senate. The conferees have provided \$17,000,000, to be derived from the Nuclear Waste Fund, for the Commission's ongoing work to characterize Yucca Mountain as a potential site for a permanent nuclear waste repository. The conference agreement also includes \$3,200,000 for regulatory reviews and other assistance provided to the Department of Energy.

The conferees concur with the concerns raised by both the House and Senate with regard to the Nuclear Regulatory Commission and have provided the Commission with buyout authority.

OFFICE OF THE INSPECTOR GENERAL

The conference agreement includes \$4,800,000, the same amount provided by the House and Senate.

NUCLEAR WASTE TECHNICAL REVIEW BOARD

The conference agreement appropriates \$2,600,000 as proposed by the House and Senate.

TENNESSEE VALLEY AUTHORITY

The conference agreement deletes language proposed by the Senate appropriating \$70,000,000 for the Tennessee Valley Authority.

No funding is provided for Land Between the Lakes.

If the Chairman of the Tennessee Valley Authority Board of Directors determines and certifies in writing to the Congress and the Director of the Office of Management and Budget that the elimination of appropriated funds is the primary reason which would cause the TVA Board to increase power rates, the Chairman of the Tennessee Valley Authority, the Secretary of the Army, and the Director of the Office of Management and Budget shall jointly submit to Congress a report with recommendations regarding whether a transfer of Federal stewardship responsibilities along the Tennessee River to the U.S. Army Corps of Engineers would be in the best interest of Tennessee Valley ratepayers by preventing or mitigating the need for such a rate increase, and if so, shall submit a legislative proposal to transfer these functions to the U.S. Army Corps of Engineers. This report shall be submitted at least six months prior to the institution of the proposed rate increase.

The conferees acknowledge TVA's traditional role in controlling aquatic vegetation growth along the Tennessee River and its tributaries. Accordingly, the conferees urge TVA to continue these efforts in Jackson County and Marshall County, Alabama with internally generated revenues.

TITLE V

GENERAL PROVISIONS

SEC. 501. The conference agreement includes a provision proposed by both the House and Senate directing that none of the funds in this Act or any prior appropriations Act may be used in any way, directly or indirectly, to influence congressional action on any legislation or appropriation matters pending before Congress, other than to communicate to Members of Congress as described in section 1913 of title 18, United States Code.

SEC. 502. The conference agreement includes language proposed by both the House and Senate regarding the purchase of American-made equipment and products, and prohibiting contracts with persons falsely labeling products as made in America.

SEC. 503. The conference agreement includes language proposed by both the House and Senate which provides that none of the funds made available by this Act may be used to determine the final point of discharge for the interceptor drain for the San Luis Unit of the Central Valley Project until development by the Secretary of the Interior and the State of California of a plan, which shall conform to the water quality standards of the State of California as approved by the Administrator of the Environmental Protection Agency, to minimize any detrimental effect of the San Luis drainage waters. The language also provides that the costs of the Kesterson Reservoir Cleanup Program and the San Joaquin Valley Drainage Program shall be classified as reimbursable or non-reimbursable by the Secretary of the Interior as described in the Bureau of Reclamation report entitled, "Repayment Report, Kesterson Reservoir Cleanup Program and San Joaquin Valley Drainage Program, February 1995" and that any future obligation of funds for drainage service or drainage studies for the San Luis Unit shall be fully reimbursable by San Luis Unit beneficiaries pursuant to Reclamation law.

SEC. 504. The conference agreement includes a provision proposed by both the House and Senate prohibiting the restart of the High Flux Beam Reactor.

SEC. 505. The conference agreement includes a provision proposed by both the House and Senate providing a one-year extension of the authority of the Nuclear Regulatory Commission to collect fees and charges to offset appropriated funds.

SEC. 506. The conference agreement includes language proposed by the House providing permanent authority for the Nuclear Regulatory Commission (NRC) to expend funds for various purposes for which the Committees on Appropriations have been providing annual authorization. The conference agreement also includes buyout authority for NRC employees through December 31, 2000.

SEC. 507. The conference agreement includes language transferring funds between two accounts in the District of Columbia Appropriations Act, 1998.

The National Capitol Revitalization and Self-Government Improvement Act of 1997 (Public Law 105-33), enacted as part of the Balanced Budget Act of 1997, called for the Federal government to assume responsibility for financing the District of Columbia Courts and the newly created trustees for offender supervision and corrections. In order to facilitate transition to these new responsibilities, the District of Columbia Appropriations Act for fiscal year 1998 (Public Law 105-100) provided the requested \$108,000,000 to finance Court operations and the requested \$20,000,000 to the new District of Columbia Offender Supervision, Defender and Court Services Agency to finance the adult proba-

tion function which was transferred from the Courts.

The conferees understand that the District of Columbia Courts have deferred paying court-appointed attorneys for services rendered because of a shortage of funds. The conferees have approved a transfer of \$1,700,000 from the District of Columbia Offender Services Trustee to the District of Columbia Courts. The transferred funds are to be used solely for the purpose of reimbursing court-appointed attorneys, in addition to any other funds for that purpose currently available or which may become available at a later date.

SEC. 508. The conference agreement includes language designating the wetlands located in Yolo County, California, and known as the Yolo Basin Wetlands, as the "Vic Fazio Yolo Wildlife Area."

SEC. 509. The conference agreement includes language dedicating to United States Senator Dale Bumpers nine areas in the State of Arkansas' National Wilderness Preservation System, and renaming the Arkansas Wilderness Act of 1984 as the "Dale Bumpers Wilderness Resources Protection Act."

Provisions not adopted by the conferees

The conference agreement deletes language proposed by the Senate prohibiting the award of funds to institutions not in compliance with certain requirements regarding campus access for units of the Senior Reserve Officer Training Corps and Federal military recruitment personnel.

The conference agreement deletes language proposed by the Senate prohibiting the use of funds to enter into or renew contracts with entities failing to comply with statutory reporting requirements concerning the employment of certain veterans.

The conference agreement deletes language proposed by the Senate pertaining to the Animas-La Plata project in Colorado and New Mexico.

The conference agreement deletes language proposed by the House repealing section 505 of Public Law 102-377, the Fiscal Year 1993 Energy and Water Development Appropriations Act, and section 208 of Public Law 99-349, the Urgent Supplemental Appropriations Act, 1986.

The conference agreement deletes a provision proposed by the House implementing external regulation of environment, safety and health activities at the Lawrence Berkeley National Laboratory. A provision requiring the Department to include all appropriate regulatory entities when conducting pilot projects to simulate external regulation at Departmental facilities has been included in title III.

TITLE VI

DENALI COMMISSION

The conference agreement deletes language proposed by the Senate establishing and authorizing the Denali Commission.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1999 recommended by the Committee of Conference, with comparisons to the fiscal year 1998 amount, the 1999 budget estimates, and the House and Senate bills for 1999 follow:

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 2071. An act to extend a quarterly financial report program administered by the Secretary of Commerce; to the Committee on Government Reform and Oversight.

ADJOURNMENT

Mr. FOX of Pennsylvania. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 22 minutes p.m.), under its previous order, the

House adjourned until tomorrow, Saturday, September 26, 1998, at 9 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

11257. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's "Major" final rule—Solid Wood Packing Material From China [APHIS Docket No. 98-087-1] (RIN: 0579-AB01) received September 18, 1998, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

11258. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—Karnal Bunt; Movement From Regulated Areas [Docket No. 96-016-32] (RIN: 0579-AA83) received September 21, 1998, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

11259. A letter from the Director, Regulations Policy and Management Staff, Office of Policy, Food and Drug Administration, transmitting the Administration's final rule—Removal of Regulations Regarding Certification of Drugs Composed Wholly or Partly of Insulin; Confirmation of Effective Date [Docket No. 98N-0210] received September 8, 1998, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Commerce.

11260. A letter from the Director, Regulations Policy and Management Staff, Office of Policy, Food and Drug Administration, transmitting the Administration's final rule—Removal of Regulations Regarding Certification of Antibiotic Drugs; Confirmation of Effective Date [Docket No. 98N-0211] received September 11, 1998, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Commerce.

11261. A letter from the Director, Regulations Policy and Management Staff, Office of Policy, Food and Drug Administration, transmitting the Administration's final rule—Obstetric and Gynecologic Devices; Reclassification and Classification of Medical Devices Used for In Vitro Fertilization and Related Assisted Reproduction Procedures [Docket No. 97N-0335] received September 23, 1998, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Commerce.

11262. A letter from the Executive Director, Committee For Purchase From People Who Are Blind Or Severely Disabled, transmitting the Committee's final rule—Procurement List Additions—September 23, 1998, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Government Reform and Oversight.

11263. A letter from the Secretary of the Interior, transmitting a report to Congress on a gift of Land in La Paz County, Arizona, pursuant to Public Law 101-628; to the Committee on Resources.

11264. A letter from the Director, Office of Regulations Management, Department of Veterans Affairs, transmitting the Department's final rule—Claims Based on Exposure to Ionizing Radiation (Prostate Cancer and Any Other Cancer) (RIN: 2900-A100) received September 21, 1998, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Veterans' Affairs.

11265. A letter from the Senior Attorney, Federal Register Certifying Officer, Financial Management Service, transmitting the Service's final rule—Offset of Federal Benefit Payments to Collect Past-due, Legally Enforceable Nontax Debt (RIN: 1510-AA74)
